Contents

1. Introduction 1

Nulliparous prolapse 1
Cervicopexy 2
Artificial Synthetic Slings 3
Purandare's Cervicopexy 3

2. Principle of Surgery 4

3. Indications, Contraindications and Prerequisites 5

Indications 5
Position 5
Contraindications 5
Prerequisites 5
Anaesthesia 5

4. Surgical Technique 6

Cervicopexy Using Fascial Sling 6
Cervicopexy Using Synthetic Mesh 40

5. Purandare's Cervicopexy Modifications 67

Advantages 67
Post-operative Management 68
Disadvantages/Complications 68

6. Types of Sling Materials 69

Purandare's modified Cervicopexy Using Mesh strip as sling 69
Suspension sling grafts 69
Allograft slings 70
Cadavaric allograft 70
Disadvantage 70
Xenograft 70
Advantages 71
Synthetic/Artificial slings 71

7. Other Suspension Operations 73
Other sling operations for young prolapse 73
Shirodkar Sling 73
Joshi's Sling 73
Khanna's Sling 73
Virkud's composite sling operation 73

8. Disadvantages and Complications of Slings 75
Complications/Side effects of Slings 75
Vascular injury 75
Nerve injury 75
Visceral injury 75
