Contents

Section 1: Infertility

1. A History of Clinical Embryology and Therapeutic IVF: From Pythagoras and Aristotle to Boveri and Edwards 3

Jacques Cohen

- From Preformation and Epigenesis to the Discovery of Chromosomes and Meiosis 4
- Preformation and the Foundation of Modern Embryology 8
- Early Cell and Germ Theories 8
- The Boveri-Sutton Model and the Chromosome Theory of Inheritance 9
- From Meiosis to the Concept of Ectogenesis 11
- Haldane, Huxley and Rock 11
- Diagnosis and Treatment of Infertility 11
- Experimental Fertilization and Preimplantation Embryology 12
- Fertilization *In Vitro* and Culturing Preimplantation Embryos 13
- Development of a Culture System 14
- Two Decades that Changed Human IVF 14
- Establishing and Expanding the Clinical Alternative: The 1980s 15
- IVF for Men 16
- Gamete and Embryo Preservation 17
- Preimplantation Genetic Diagnosis 17
- The Evolution of Reproductive Clinical Science 17

2. Fertility Testing and Treatment in 2020 20

Rebecca J Chason, Alan H DeCherney

- Imaging 20
- Laboratory 21
- Genetics 21
- Medications 23

Section 2: Male Factor Infertility

3. Evaluation and Diagnosis of Male Infertility 29

Sandro C Esteves, Alaa Hamada, Ashok Agarwal

- Definition and Epidemiology of Male Infertility 29
- Pathophysiology, Etiology and Classification of Male Infertility 30
- Probabilities of Conception for Fertile and Infertile Couples 31
- Goals and the Proper Timing for Fertility Evaluation 32
- Approaching the Subfertile Male 34

4. Hormonal Management of Male Infertility 57
Alaa Hamada, Deepinder Goyal, Ashok Agarwal
- Physiological Overview 57
- Hypothalamic Pituitary Gonadal Axis (HPG) 60
- Clinical Endocrine Evaluation of Infertile Man 66
- Diseases of the HPG Axis 69
- Diseases of the Adrenal Glands 70
- Thyroid Disorders 70
- Excess Estrogen 71
- Diabetes Mellitus and Metabolic Syndrome 71
- Hormonal Intervention in Male Infertility 71
- Cytoprotective Hormonal Effects on Sperm in Cancer Patients 75

5. Immunology of Male Infertility 79
Walter KH Krause, Rajesh K Naz
- Sperm Proteome 79
- Formation of Antisperm Antibodies 80
- Risk Factors of Antisperm Antibodies Formation 81
- Tests for Sperm Antibodies 82
- Treatment of Immune Infertility 83

6. Surgical Management of Male Infertility..... 90
Sandro C Esteves, Alaa Hamada, Ashok Agarwal
- Surgical Treatment to Improve Sperm Production 91
- Reconstructive Surgeries of Ductal System 95
- Ejaculatory Duct 101
- Sperm Retrieval Techniques 103
- Preoperative Planning 103
- Operative Procedure 104
- Postoperative Care and Results 107

7. Genetics and Male Infertility..... 113
Alaa Hamada, Sandro C Esteves, Ashok Agarwal
- Genetic Concepts 113
- Evidence of Genetic Contribution for Male Infertility 115
- Sperm Genome: Definitions and Concepts 116
- Genetic Disorders Causing Male Infertility 119
- Importance of Genetic Testing and Counseling 141
- Preimplantation Genetic Diagnosis 142
- Genetic Tests 142
- Work-Up Plan for Specific Genetic Diagnosis and Testing 143
- Novel Technologies 143

Section 3: Female Factor Infertility

8. Evaluation and Diagnosis of Female Infertility 161
Alan S Penzias, Barbara Dube, Robin Irish
- Ovary and Oocyte 161
- Cervix, Uterus and Fallopian Tubes 164
- Pelvic Anatomy 165
- Systemic Evaluation 165
- Evaluation Timeline 166

9. Anovulation and Amenorrhea 167
Vasiliki A Moragianni, Kim L Thornton
- Anatomic Causes 167
- Hypothyroidism and Hyperprolactinemia 169
- Hypergonadotropic Hypogonadism 169
- Hypogonadotropic Hypogonadism 170
- Hypopituitarism 171
- Polycystic Ovary Syndrome 171

10. Polycystic Ovary Syndrome: Diagnostic Criteria and Treatment in the Anovulatory Patient 173
Laurel A Stadtmauer
- Pathophysiology of Polycystic Ovary Syndrome 174
- Treatment for Women with Polycystic Ovary Syndrome and Infertility 176

11. Endometriosis and Infertility 184
Albert L Hsu
- Epidemiology 184
- Diagnosis 184
- Infertility 185
- Future Directions 186

12. Recurrent Pregnancy Loss 188
John C Petrozza, Aleksandar Stanic, Annemarie E Fogerty
- Incidence 188
- Etiology 189
- Immune Pathophysiology of Recurrent Pregnancy Loss 195

13. Cancer and Fertility Drugs 205
Shvetha M Zarek, Anil K Dubey
- Mechanism of Action of Hormones in Cancer 205
- Biologic Plausability 207
- Clinical Data 207

14. Unexplained Infertility 214
Ioanna Athanasiadis, Anil K Dubey
- Possible Etiologies of Unexplained Infertility 214
- Prognosis of Unexplained Infertility 215
- Clinical Evaluation to Diagnose Unexplained Infertility 215
- Treatment of Unexplained Infertility 216

15. Reproductive Surgery: Technique and Reproductive Outcomes 221
Molina B Dayal, Nadim Hawa, Gaby Moawad
- Surgical Principles 222
- Laparoscopy: An Overview 223
- Hysteroscopy: An Overview 224
- Treatment of Specific Reproductive Disorders as Applied to Fertility 224
- Disorders of the Uterus 224
- Disorders of the Pelvic Peritoneum and Ovary (Endometriosis) 232
- Disorders of the Fallopian Tube 234
- Second Operations 236
- Recent Advances in Reproductive Surgery 239
- Concluding Thoughts 240

16. The Molecular and Genetic Basis of Infertility 243
Karenne N Fru, Kimberly S Moon, James H Segars
- Molecular and Genetic Mechanisms Involved in Infertility 243
- Genes Affecting Gametes/Gametogenesis 245
- Genes Affecting the Embryo 247
- Genes Affecting the Development and Function of Reproductive Organs 247
- Genetics in the Evaluation of the Infertile Couple 251
- The Future of Molecular and Genetic Evaluation of the Infertile Couple 253

17. Female Reproductive Aging 261
Keri Kalmbach, Lin Liu, David Keefe
- The Oocyte Throughout Development 262
- Mitochondria and Free Radicals 263
- Spindle Abnormalities 263
- Chromosome Abnormalities; Chiasmata, Cohesin 264
- A Telomere Theory of Reproductive Aging 264
- Ovarian Reserve Testing and Ovarian Aging 265
- Other Genetic Models 266
- Closing Remarks 266

18. Ovarian Reserve Testing 269
Vasiliki A Moragianni, David B Seifer
- What is Ovarian Reserve? 269
- Properties of Screening Tests 270
- Available Tests of Ovarian Reserve 270
- Special Circumstances 272

Section 4: In Vitro Fertilization

19. Controlled Ovarian Hyperstimulation for In Vitro Fertilization 277
David Frankfurter
- Stimulating Agents 278
- Suppressive Agents 278
- Controlled Ovarian Hyperstimulation Protocols in *In Vitro* Fertilization 279

20. Procedures and Protocols in In Vitro Fertilization Laboratory 283
Douglas Peak, Reem Khaldi, Anil K Dubey
- *In Vitro* Fertilization Equipment 283
- Supplies (Media and Disposables) 285
- Quality Management Program 286
- Training and Protocols 287

21. Cryopreservation of Human Embryos 311
Nina Desai, Faten Abdel Hafez
- Cryopreservation Techniques 312
- Cryoprotectant Agents 314
- Cryostorage Vessels or Carriers 315
- Developmental Cell Stage and Embryo Cryopreservation Outcomes 317
- Zona Opening and/or Thinning 318
- Endometrial Preparation in Frozen Thawed Cycles 319
- Safety of Embryo Cryopreservation 319

22. Oocyte Donation Program 325
Brian A Levine, Mark V Sauer
- Indications for Egg Donation and the Precycle Testing of Recipients 326
- Donor Screening and Safeguards 327
- Synchronization Schemes for Donors and Recipients 328
- Clinical Results and Pregnancy Outcomes 329
- Controversies that Surround the Use of Donor Eggs 329
- Future Use and Anticipated Role of Egg Donation in Assisted Reproduction 331

23. Luteal Phase Supplementation in In Vitro Fertilization 333
Mindy S Christianson, Suheil J Muasher
- Rationale for Luteal Phase Supplementation 333
- Routes of Progesterone Administration 334
- Comparing Oral Progesterone with Other Modalities 334
- Optimal Dose of Progesterone 335
- Addition of Human Chorionic Gonadotropin to Progesterone 335
- Addition of Estradiol to Progesterone for Luteal Supplementation 336
- Duration of Luteal Phase Supplementation 337
- Role for Gonadotropin-Releasing Hormone Agonists in Luteal Phase Supplementation 337

24. Fertility Preservation for Women 342
Ioanna Athanasiadis, Molina B Dayal, David Frankfurter
- Treatment and Ovarian Function 342
- Fertility Preservation Techniques 343
- Ovarian Transposition 343
- Gonadotropin-Releasing Hormone Agonists 344
- Ovarian Tissue Cryopreservation 345
- Oocyte Cryopreservation 345
- Embryo Cryopreservation 346
- Oocyte Donation 346

25. Advanced Reproductive Age and ART 350
Paul R Gindoff
- Ovarian Reserve Testing 351
- Treatment 352

26. Preimplantation Genetic Screening/Diagnosis 357
Anil K Dubey, Gary L Harton, Santiago Munne
- Human Oocytes and Embryo Biopsy 358
- DNA Techniques Used in PGD 360
- Genetic Diagnosis by PCR 361
- Fluorescence *In Situ* Hybridization 362
- Comprehensive DNA Analysis Techniques 364
- Validation of CGH and SNP Arrays 368
- Clinical Results 368

27. Third Party Reproduction: Current Status and Future 373
Gautam N Allahbadia, Rubina Merchant, Gandhi Goral
- Third Party Reproduction 374
- Issues in Third Party Reproduction 376
- Outcomes of Third Party Reproduction 386
- Future Recommendations and Solutions 387
- Recent Advances 390

28. Natural Cycle In Vitro Fertilization: The Current Practice 395
John David Gordon, Michael DiMattina
- Historical Perspective 395
- Terminology—What is Natural Cycle *In Vitro* Fertilization? 396
- Patient Selection 397
- Technical Aspects 397
- Outcome Data 404
- Utilization in the United States 404
- The Future 405

29. Sperm Banking: Indications and Regulations 409
Alaa Hamada, Monika Wasik, Sajal Gupta, Ashok Agarwal
- Who can Benefit from Sperm Banking and Why? 410
- Counseling and Ethical Considerations 414
- Process of Cryopreservation 417
- The Rise of Oncofertility as a Field 429
- Available Resources on Fertility Preservation 430
- Conclusions and Future Research 430
- Recommendations 430

30. Ovarian Hyperstimulation Syndrome During Infertility Treatments..... 435
Jason Parker, NC Fayetteville
- Pathophysiology 436
- Classification 436
- Risk Factors 437
- Presentation of Symptoms 437
- Prevention 438
- Treatment 440

Section 5: Practice Guideline for Infertility Treatments

31. Practice Guidelines for the Treatment of Patients with Infertility 447
Candice O'Hern Perfetto, Molina B Dayal, Anil K Dubey
- Non-Assisted Reproductive Technology Therapies 448
- Assisted Reproductive Technology Therapies 449

32. Integrating Quality Management into a Fertility Practice 457
Michael M Alper
- What is Quality? 457
- Do High Pregnancy Rates Mean High Quality? 458
- Quality: Beyond the *In Vitro* Fertilization Statistic 458
- Quality is What the Customer Says it is 458
- A Word About the Reception Desk 458
- Why a Quality Management System? 459

Section 6: Birth Defects and Assisted Reproductive Technology

33. Assisted Reproductive Technology and Birth Defects..... 465
Erin Foran Wolff, Robert W Rebar, Alan H DeCherney
- Research in ART is Difficult 465
- Clinical Experience with ART 466
- Theoretical Concerns 466
- Animal Data 466
- Twins and Congenital Malformations 466

- Adverse Outcomes in Singleton ART Pregnancies 467
- Early Evidence of Birth Defects 467
- Recent Evidence: The Effect of Underlying Infertility 467
- Epigenetic Effects of ART 467
- Other Epigenetic Evidence 468
- Patient Counseling 469

Section 7: Regulation of Assisted Reproductive Technology Laboratory

34. Regulation of the Assisted Reproductive Technology Laboratory 475
Sangita Jindal
- Models of Assisted Reproductive Technology Laboratory Oversight 476
- Assisted Reproductive Technology Laboratory Oversight Worldwide 476
- Regulation and Accreditation of Assisted Reproductive Technology Laboratories and Personnel 477

Section 8: Emotional and Social Aspects of Infertility Treatment

35. Emotional and Social Aspects of Infertility Treatment 485
Kristin L Rooney, Alice D Domar
- The Emotional Impact of Infertility 486
- Financial and Decision-Making Stressors 487
- Social and Cultural Influences of Infertility 487
- Stress and Treatment Outcome 488
- Treatment Distress and Termination 488
- Cognitive-Behavioral Interventions 489

Index 493
