Contents

1. Vaginal Vault Prolapse 1

Introduction 1
Prevention 1
Management options 2
Vaginal procedures for vault suspension 3
Enterocoele repair 3
McCall Culdoplasty 3
Sacrospinous Ligament Fixation of vault 3
Iliococcygeus Fascia Suspension 3
Complications 4
Abdominal procedures to suspend the vagina 4
For Enterocoele 4
Abdominal Colpopexy 5
Laparoscopic approach to vaginal suspension 5
Obliterative procedures 5
Le Fort Partial Colpocleisis 5
Colpectomy and Colpocleisis 5

2. The Operation 6

Ventral Vault suspension 6
Abdominal Sacral Colpopexy 39
Introduction 39
Problems 39
Benefits 39
Preoperative Patient Workup 40
History 40
Examination 40
Preoperative Counselling 41
Patient Preparation Bowel Preparation 41
Antibiotic Prophylaxis 41
Medications 41

Intraoperative 42
Positioning, Lighting, and Visualisation 42
Instruments and Materials 42
Dissection 42
Posterior Sacrocolpopexy 43
Laparotomy 45
Vaginal vault exposure and dissection 48
Right sided retroperitoneal tunneling 55
Pre-sacral transverse incision 57
Left Psoas muscle exposure 62
Right sling formation 70
Left sling formation 79
Vaginal vault reperitonisation 87
Cranial half of left mesh strip 92
Peritoneal closure over the left psoas muscle 97
Pre-sacral fixation of mesh strips (posterior sling) 102
3. Complications 115
Intraoperative Bleeding/Haemorrhage 115
Injury to the Rectum 115
Ureteral Injury 115
Surgically Small Vagina (shortening, narrowing, bridging) 116
Mesh erosion 116
Infection 116
4. Alternative Treatment 117
Alternative Surgeries 117
Transvaginal posterior colporrhaphy 117
Sacrocolpoperineopexy 117
Alternative Therapies To Surgery 118
Pessary 118
Diet and Lifestyle 118
Exercises 118
Physical therapy 118
