Contents

1. Introduction 1

2. Historical Background 5

3. Definitions 12

Disinfectant 12
Legal Definition (Reddish, 1957) 12
Antiseptic 12
Legal Definition (Federal Food, Drug and Cosmetic Act, 1938) States 13
Sterilization 13
Algicide 13
Antibiotic 13
Antimicrobial Agent 13
Bactericide 14
Bacteriostat 14
Bioburden 14
Biocide 14
Biologic Indicator 14
Chemisterilant 15
Contamination 15
Decontamination 15
Droplet nuclei 15
Fomites 15
Fumigation 15
Germicide 16
Gnotobiotics 17
Laminar Airflow 17
Nosocomial 17
Cross-infection 17
Disease 17
Exogenous Infection 17
Immunocompromised 17
Immunosuppressed 18

Infection 18
Microorganisms or Microbe 18
Opportunistic Pathogens 18
Pathogen 18
Septic 18
Spores 18
Sterile 18
Sterilize 19
Vector 19
Vegetative Form 19
Virulence 19
Virus 19

4. Microbial Control 21
Microbial Etiology 22
Bacterial Infection 22
Most Common Bacterial Pathogens 22
Nonbacterial Infection 24
Viability of Organisms 24
Toxins of Microbial Origin 24
Sources of Contamination 25
Skin 26
Hair 26
Nasopharynx 26
Fomites 26
The CDC Identification of those at High Risk 27
How Diseases are Transmitted? 27
Air 27
Human Error 28
Cross Infection 28
Pattern of Death in a Microbial Population 28
When is a Microbe Really Dead? 30
Conditions that Affect Antimicrobial Activity 30

5. Biological Indicators for Verifying Sterilization 32
Use of Biological Indicators 34
Chemical Monitoring 38
Handling of Processed Instruments 42

6. General Aseptic Precautions 47
Application of Principle of Aseptic and Sterile Techniques 47
Universal Precautions 49

Categories of Isolation 54
Suggested Labels for Categories of Isolation 54
Transfer Zones 56
Accommodation 61
No Compromise of Sterility 73

7. Methods of Sterilization 74
Physical Agents 74
Chemicals 75
Dry Heat 77
Hot Air Oven 77
Precautions to be Taken 78
Disadvantage 79
Heat Transfer Devices 79
Moist Heat 79
Types of Sterilizers 82
Hot Oil Baths 83
Filtration 83
Types of Filtration 83
Radiation 84
Nonionizing Radiation 84
Ionizing Radiation 84
Radioisotopes 84
Ultrasonic and Sonic Vibration 85
Sterilization vs Disinfection 96
Sterilization Process 100
Thermal Sterilization 105
Wood Products 113
Hot Air-dry Heat 126
Chemical Sterilization 129

8. Attire, Surgical Scrub, Gowning and Gloving 140
Operating Room Attire 140
Surgical Scrub 158
Gowning and Gloving 169

9. Preparation of Patient Skin and Draping the Surgical Site 185
Skin Preparation at Operation 185
Skin Preparation and Draping of the Surgical Site 187
Skin Preparation of Patient 188

Patient's Skin on Operating Table 192
Draping 204

10. Physical Facilities 222
Physical Layout of the Surgical Suite 222
Transition Zones 228
Operating Room 230
Special Procedure Rooms 246

11. Biomedical Waste Management 248
Definition 249
Components of Biomedical Waste 249
Infectious Waste 250
Packaging of Infectious Waste 253
Standards for Microwaving 257

12. Hospital Acquired Infection 260
Hospital Acquired Infection 260
Historical Milestones 262
Classification of Surgical Wounds 264
Risk Factors Affecting the Rate of Postoperative Wound Infections 266
Control of Nosocomial Infections 274

Index 277
