CONTENTS

1. Mechanics of Recording ECG 1
2. Vectorial Concept of the QRS 2
3. Orientation of the ECG Leads 3
4. Systematic Approach to the Interpretation of ECG 4
5. ECG Waves, Intervals and Segments 4
6. Guide for Heart Rate Estimation 5
7. Proper Labeling of the Component Waves of the Ventricular Depolarization 6
8. QRS Axis 7
9. Glossary of Cardiac Rhythms 8
10. A Normal ECG 18
11. P Wave Abnormalities 20
12. Ventricular Hypertrophy, Left, Right and Biventricular 21
13. Intraventricular Conduction Defect
    - *Bundle Branch Block* *30*
    - *Fascicular Block* *33*
14. AV Block 37
15. Myocardial Infarction 50
16. Simple Electrophysiologic Characteristics of the Conduction Systems 92
17. P-QRS Relationships in Arrhythmias
    - *Reciprocal Beats* *99*
    - *Ventricular Capture Beats* *101*
    - *Fusion Beats* *101*
    - *AV Dissociation* *102*
    - *Ventriculophasic Sinus Arrhythmia* *109*
    - *Retrograde Conduction to Atria* *111*
18. Atrial Premature Beats 112
19. Atrial Tachycardia 116
20. Role of the AV Junction in Supraventricular Arrhythmias 118
21. Effects of Adenosine in Supraventricular Arrhythmias 119
22. Supraventricular Tachycardia (SVT) 120

23. Atrial Fibrillation 123
24. Atrial Flutter 129
25. Multifocal Atrial Tachycardia 146
26. Ventricular Premature Beats 150
27. Usefulness of Ventricular Premature Beats 154
28. Aberrant Conduction 161
29. Ventricular Tachycardia 165
30. Electrolyte Problems 171
31. Sinus Node Dysfunction 186
32. Electronic Pacemaker 190
33. Stress Electrocardiography 196
34. Atrial Repolarization (Ta) Wave 197
35. Ventricular Pre-excitation 200
36. Concealed Conduction 214
37. ST-Segment Elevation in Conditions Other than Myocardial Infarction
    - *Normal* *222*
    - *Early Repolarization Pattern as a Normal Variant* *225*
    - *"The Other" Normal Variant* *226*
    - *Left Ventricular Hypertrophy* *23*
    - *Left Bundle Branch Block* *81*
    - *Pericarditis* *227*
    - *Prinzmetal's Angina* *228*
    - *Brugada Syndrome* *229*
    - *Pulmonary Embolism* *230*
    - *Stress Cardiomyopathy* *231*
    - *Cardioversion* *232*
    - *Hyperkalemia* *177*
    - *'Metabolic' ST Elevation* *233*
38. Miscellaneous:
    - *Accelerated AV Conduction* *234*
    - *Acute Cor Pulmonale* *235*
    - *Atrial Septal Defect, Primum and Secundum* *237*
    - *Bidirectional Tachycardia* *239*
    - *Brugada Syndrome* *229*
    - *Cardioinhibitory Response* *240*
    - *Dextrocardia* *241*
    - *Digitalis Effect on the ST-Segment* *242*
    - *Duchenne Muscular Dystrophy* *243*

- *Early Transition* 244
- *Ebstein's Anomaly* 245
- *Electrical Alternans* 246
- *Hypertrophic Cardiomyopathy* 250
- *Hypothermia* 251
- *Late Transition* 253
- *Long QT Interval* 254
- *Low QRS Voltage* 255
- *Memory T–Wave* 256
- *Mitral Stenosis* 257
- *Nonspecific ST-T Changes* 258
- *Poor R-Wave Progression* 259
- *Stress Cardiomyopathy* 260
- *Swan-Ganz Catheterization Causing High Grade AV Block in a Patient with LBBB* 261
- *T-Wave Alternans* 262
- *Transplanted Heart* 263
- *Tricyclic Overdose* 264
- *U Waves* 265
- *U Waves Mimicking P Waves* 266

39. Artifacts 267

40. Differential Diagnosis of:
    - *Regular Narrow-QRS Tachycardia* 273
    - *Regular Narrow-QRS Bradycardia* 282
    - *Pauses* 284
    - *Tall R Waves in the Right Precordial Lead* 285
    - *Bigeminal Rhythm (Paired QRS Complexes)* 292
    - *Changing QRS Axis or Morphology* 294
    - *ST-Segment Elevation in V1-3* 296

41. Addendum
    - *How to Make an Interpretation of Arrhythmia Easy, Correct, Convincing and Clinically Relevant?* 298
    - *A Little Rhythm Strip that Told the Whole Story* 300

Index 301
