Contents

1. ORAL MEDICINE

1. Clinical Diagnosis 3-5
2. Teeth Anomalies 6-15
3. Developmental Defects of Craniofacial Structures 16-18
4. Keratotic and Nonkeratotic Lesions 19-24
5. Vesicular Bullous and Erosive Lesions 25-30
6. Oral Pigmentation 31-37
7. Oral Premalignant Lesions and Conditions 38-46
8. Odontogenic Tumors of the Jaw 47-50
9. Benign Tumors of the Jaw 51-58
10. Malignant Tumors of the Jaw 59-64
11. Cysts of Jaw 65-69
12. Bacterial Infections and Viral Infections 70-77
13. Salivary Gland Disorders 78-83
14. Soft Tissue Calcifications 84-84
15. Infections of Oral Cavity 85-91
16. AIDS 92-95
17. Blood Disorders 96-99
18. Endocrine Disorders 100-102
19. Vitamins 103-105
20. Diseases of Tongue and Lip 106-111
21. Orofacial Pain 112-115
22. Disordres of Maxillary Sinus 116-117
23. Neuromuscular Disorders 118-120
24. Diseases of Bone Manifested in Jaws 121-124

2. ORAL RADIOLOGY

1. Dental Anomalies 127-128
2. Dental Caries 129-129
3. Diseases of Bone Manifested in Jaws 130-131
4. Extraoral Radiographic Examination 132-136
5. Guidelines for Prescribing Dental Radiographs 137-137
6. Inflammatory Lesions of the Jaw 138-139
7. Intraoral Radiographic Examination 140-141
8. Normal Radiographic Anatomy 142-143
9. Panoramic Imaging 144-146
10. Periodontal Diseases 147-148

11. Physics of Ionizing Radiations 149-150
12. Principles of Radiographic Interpretation 151-152
13. Processing of X-ray Films 153-155
14. Projection Geometry 156-157
15. Radiation Biology 158-160
16. Radiation Safety and Protection 161-161
17. Radiographic Quality Assurance + Infection Control 162-162
18. Trauma to Teeth and Facial Structure 163-164
19. X-ray films, Intensifying Screens and Grids 165-167
20. Advanced Imaging 168-169
21. Temporomandibular Joint Disorders 170-171

3. PERIODONTICS

1. The Normal Periodontium 175-182
2. Classification of Periodontal Disease 183-183
3. Etiology of Periodontal Diseases 184-190
4. Periodontal Pathology (Gingival Diseases) 191-203
5. Periodontal Pathology (Periodontal Diseases) 204-212
6. Relationship between Periodontal Disease and Systemic Health 213-216
7. Diagnosis, Prognosis and Treatment Plans of Periodontal Diseases 217-225
8. Periodontal Instrumentation 226-239
9. Treatment of Periodontal Emergencies 240-241
10. Nonsurgical Therapy 242-250
11. Surgical Therapy 251-260
12. Periodontal—Restorative Interrelationships and Periodontal Maintenance 261-261

4. PEDODONTICS

1. Caries Control Approach 265-267
2. Child Abuse 268-270
3. Cleft Lip and Palate 271-273
4. Child Psychological Development and Behavior Management in Dental Operatory 274-285
5. Dental Caries in Pediatrics 286-289
6. Developing Malocclusion and its Management 290-294
7. Development of Dentition 295-300
8. Extractions 301-301
9. General Concepts in Pedodontics 302-308
10. Gingival and Periodontal Diseases in Children 309-312
11. Management of Medically Compromised Patients 313-316
12. Oral and Maxillofacial Injuries in Children 317-317
13. Oral Habits 318-320
14. Pediatric Endodontics 321-325
15. Pediatric Restorative Dentistry 326-331
16. Pit and Fissure Sealants 332-333

17. Water Fluoridation in Pediatric Dentistry *334-341*
18. Dental Care for the Special Child *342-343*

5. ORTHODONTICS

1. Introduction of Orthodontics—Growth and Development *347-352*
2. Concepts of Occlusion and Malocclusion *353-361*
3. Orthodontic Diagnosis *362-365*
4. Biomechanics *366-368*
5. Preventive and Interceptive, Orthodontics and Space Gaining *369-375*
6. Orthodontic Appliances *376-390*
7. Corrective Orthodontics *391-397*
8. Surgical Orthodontics—Retention and Relapse *398-400*
9. Miscellaneous *401-402*
