Contents

Section 1: Basic Laboratory Principles

1. **Laboratory Equipments, Glassware, Laboratory Hazards and General Laboratory Rules.....3**

   Laboratory Equipments 3
   Laboratory Glassware 4
   Laboratory Hazards 7
   Laboratory Safety Procedure 7
   Laboratory First Aid 10

2. **Laboratory Units, Basic Calculations and Preparation of Solutions 11**

   Units 11
   Preparation of Molar and Normal Solutions 13
   Preparation of Percent Solutions 14

3. **Acids, Bases, Alkalies, pH, Indicators and Buffers 15**

   Acids and Bases 15
   Alkali 15
   Indicators 15
   Buffers 16

Section 2: Qualitative Experiments

4. **Carbohydrates.....21**

   Definition 21
   Classification 21

5. **Reactions of Carbohydrates.....23**

   Molisch's Test 23
   Iodine Test 23
   Benedict's Test 24
   Barfoed's Test 25
   Seliwanoff's Test 25
   Osazone Test 25
   Reactions of Monosaccharides 26
   Reactions of Disaccharides 27
   Scheme for Identification of Unknown Carbohydrates 28
   Reactions of Polysaccharides 28

6. Proteins 30

Definition 30
Elemental Composition 30
Functions 30
Classification 30

7. Color Reactions of Proteins 32

Protein and its Color Reactions 32

8. Precipitation Reactions of Proteins 38

Methods of Precipitation Reactions 38
Significance of the Precipitation Reactions 39
Scheme for Identification of Unknown Proteins 41

9. Reactions of Nonprotein Nitrogenous (NPN) Substances 42

Nonprotein Nitrogenous Substances 42

10. Scheme for Identification of Physiologically Important Substances 44

11. Urine Analysis (Normal Urine) 45

Analysis of Normal Constituents in Urine 45
Determination of Specific Gravity 45

12. Analysis of Abnormal Constituents in Urine 50

Physical Characteristics 50
Chemical Constituents 50

13. Inborn Errors of Metabolism 54

Screening Tests for Inborn Errors of Amino Acid Metabolism 54
Screening Tests for Inborn Errors of Carbohydrate Metabolism 56

14. Analysis of Gastric Juice 58

Tests for Normal Constituents 58
Tests for Abnormal Constituents 59

15. Analysis of Saliva 61

Collection of Saliva 61

16. Preparation of Hemin Crystals 63

Preparation of Hemin Crystals 63

17. Sample Collection and Preservation 64

Blood Sample Collection and Preservation 64
Urine Collection and Preservation 65

Section 3: Quantitative Experiments

18. Estimation of Blood Sugar by Folin-Wu Method.....69

Principle 69
Procedure 69
Calculation 70
Clinical Aignificance 71
Other Methods 71

19. Estimation of Blood Glucose by O-Toluidine Method 72

Principle 72
Procedure 72
Calculation 73

20. Estimation of Blood Urea by Diacetyl Monoxime (DAM) Method 74

Principle 74
Procedure 74
Calculation 75
Clinical Significance 75
Other Methods 76

21. Estimation of Serum Total Protiens, Albumin and Albumin/Globulin Ratio by Biuret Method 77

Principle 77
Procedure 77
Calculation 78
Clinical Significance 78

22. Estimation of Serum Albumin by Dye-Binding Method 80

Principle 80
Procedure 80
Calculation 80
Other Methods 81

23. Estimation of Serum Inorganic Phosphate by Fiske and Subba Row Method.....82

Functions of Phosphorus 82
Principle 82
Procedure 83
Calculation 83
Clinical Significance 83
Other Method 84

24. Estimation of Serum Cholesterol by Zak's Method.....85

Principle 85
Procedure 85
Calculation 86
Clinical Mignificance 86
Other Methods 86

25. Estimation of Serum Uric Acid by Caraway Method.....87

Principle 87
Procedure 87
Calculation 88
Clinical Significance 88
Other Methods 88

26. Estimation of Serum Bilirubin by Malloy and Evelyn Method.....89

Principle 89
Procedure 89
Calculation 90
Clinical Significance 90

27. Estimation of Serum Creatinine by Jaffe's Alkaline Picrate Method.....92

Creatine 92
Principle 92
Calculation 93
Clinical Significance 93

28. Estimation of Vitamin C (Ascorbic Acid) in Plasma by Sauberlich Method.....94

Principle 94
Procedure 94
Calculation 94
Clinical Sgnificance 95

29. Estimation of Vitamin A in Serum by Bessey Method.....96

Principle 96
Procedure 96
Calculation 96
Clinical Significance 96

30. Estimation of Serum Transaminases by Reitman and Frankel Method.....97

Principle 97
Procedure 97
Calculation 98
Clinical Significance 98
Other Methods 99

31. Estimation of Serum Alkaline Phosphatase by Kind and King Method 100

Principle 100
Clinical Significance 101

32. Estimation of Serum Calcium by O-Cresolphthalein Complexone Method 102

Principle 102
Calculation 103
Clinical Significance 103
Other Methods 103

33. Estimation of Urine Creatinine By Jaffe Alkaline Picrate Method 104

Principle 104
Procedure 104
Calculation 104
Clinical Significance 105

34. Estimation of Urinary Proteins by Turbidimetric Method 106

Principle 106
Procedure 106
Calculation 106
Other Methods 107

Section 4: Clinical Biochemistry Techniques and Recent Aspects of Clinical Biochemistry

35. Colorimetry—General Principle and Procedure 111

Principle 111
Procedure 113
Calculation 113
Applications of Colorimetric Assays 113

36. Potentiometry 114

Indicator Electrodes 115
pH Meter 115
Ion-Selective Electrodes 117

37. Flame Photometer—General Principle and Procedure 118

Flame Photometry 118

38. Electrophoresis—General Principle and Procedure....121
Electrophoresis 121

39. Chromatography—General Principle and Procedure....124
Chromatography 124

40. Automation in Clinical Biochemistry....128
Types of Analyzers 128

41. Quality Control in Clinical Biochemistry....130
Investigation of Clinical Laboratory 130

42. Oral Glucose Tolerance Test....134
Assessing the Status of Glucose Tolerance 134

43. Case Reports....139

44. Normal Values of Biochemical Parameters....147

Section 5: Reagent Preparations

45. Reagent Preparations....153
Reagents for Qualitative Experiments 153
Reagents for Quantitative Experiments 155

Index....159
