Contents

Zero Point: Approach Road to Learning 1
Statistics in a Nutshell 8

Section 1: Bioethics, Evidence-based Medicine

1. Bioethics in Clinical Research 13
Major Divisions of Ethics 13; Bioethics 14; Main Branches of Bioethics 14
Etymology, History and the Famous Nonethical Experiments 14
Dachau and Auschwitz Concentration Camp Hypothermia Experiments 15
Animal Ethics 34; Environmental Ethics 35; Anthropocentrism 36

2. Evidence-based Medicine and Levels of Evidence 38
Evidence-based Medicine 38; Fundamental Principles 38
Components of Evidence-based Practices 39

3. Introduction to Statistics 49
Etymology 49; History 49; Notable Contributors 50
India in Modern Context 51; Applications 51; Summing Up 52; Biostatistics 52

Section 2: Research Methodology and 'Back to School'

4. Research Methodology 57
Objectives of Research 57; Types of Research 58
Approaches to Research 59; Research Methods 60; Research Methodology 60

5. Inside Research Methodology: The Nuts and Bolts 63
What Constitutes a Research? 63; Research Plan 72

6. Back to School 74
Greek Alphabets 74; Common Mathematical Operators/Symbols 75
Modulus 76; Basics of Set Theory and Venn Diagrams 76; Indices 79
Progressions: Arithmetic and Geometric Progressions 79
Logarithms and Antilogarithms 80; The Exponential Function 'e' 81
Ratio 81; Proportion 82; Factorial; 82; Permutations and Combinations 83

Section 3: Describing the Data

7. Frequency Distribution 87
Classification of Data 87; Variables: Discrete and Continuous 89
Frequency Distributions: Discrete and Continuous 89
Relative Frequency Distribution 93
Bivariate or Two Way Frequency Distribution 93; Marginal Distribution 94

8. Measures of Central Tendency 95
Central Value Concept 95; Measures of Central Tendency 95
Types of Measures of Central Tendency 96; Median (M_d) 100
Quartiles, Deciles and Percentiles 103; Mode (M_0) 105
Harmonic Mean 109; Which Measure to Use? 111

9. Measures of Dispersion (or Variation) 114
Understanding Dispersion 114; Types of Measures of Dispersion 115
Quartile Deviation 116; Percentile Deviation 116; Mean Deviation 116
Standard Deviation 117; Lorenz Curve 119
Coefficient of Dispersion and Its Measures (Also referred as a Relative Measure of Variation) 120; Which Measure of Dispersion to Use? 121

10. Skewness, Moments and Kurtosis 122
Skewness 122; Kurtosis 125; Moments 126; Significance 127

Section 4: Probability, Probability Distribution and Sampling

11. Theory of Probability 131
Terminology in Probability Theory 132; Approaches to Probability 133
Conditional Probability 137; Bayes Theorem 139

12. Theoretical Discrete Probability Distributions 142
Underlying Concepts and Terminology 142
Types of Theoretical Discrete Distributions 147

13. Theoretical Continuous Probability Distributions 163
Normal Distribution 163; Rectangular Distribution 174
Lognormal Distribution 176; Exponential Distribution 176

14. Sampling Theory 178
What is a Sample and why it is Required? 179; Types of Sampling Methods 180
Advantages and Disadvantages of Sampling 182
What should be the Sample Size? 183; Sampling Errors 185
Standard Error 186; Underlying Basis of Sampling Theory 186

Section 5: Correlation, Regression, Partial and Multiple Correlation and Regression, Theory of Attributes

15. Correlation 191
What is Correlation? 191; Correlation Measures 192

16. Regression Analysis 205
Components of Regression Analysis 205; Types of Regression 206
Linear Regression Analysis and Line of Best Fit 207; Logistic Regression 212

17. Partial and Multiple Correlation and Regression 216
Partial Correlation; 216; Multiple Correlation 217
Partial and Multiple Regression 218; Multicollinearity 221

18. Theory of Attributes 225
Terminology of Attribute Theory 225; Association of Attributes 228

Section 6: Statistical Testing

19. Hypothesis Testing 235
Basic Concepts 236;
Practical Considerations in Framing and Testing Hypothesis 246

20. Tests of Significance (Z and Student's 't'-Test) 248
Large Sample Tests 249; Small Sample Tests (Student's t-tests) 256
What is P-value? 267

21. F-Test and Analysis of Variance and Covariance 269
Constants and Properties of F-Distribution 269; Applications 270

22. Chi-square Test 286
Degrees of Freedom 286; Salient Points of Chi-square 287
Chi-square Distribution 288; Applications of χ^2 Distribution 289
Chi-square Test of Homogeneity of Correlation Co-efficient 298
Remarks on Chi-Square 300

23. Nonparametric Tests 301
Advantages 301; Disadvantages 302
Run Test: Test for Randomness in a Series of Observations 302
The Signed-rank Test for Testing Specified Mean or Median of a Population 303
Wilcoxon Signed Rank Test for Paired data 304

Kolmogorov-Smirnov Test for One Sample 307
Kolmogorov-Smirnov Test (For Comparing Two Populations) 308
Mann-Whitney 'U' Test for Equality of Two Means 310
Wilcoxon-Wilcox Test for Comparison of Multiple Treatment on a Series 311
Kruskal-Wallis Rank Sum Test (H-Test) 313
Friedman Test (Two-way ANOVA) 314
Test of Significance of Spearman's and Kendall Rank Correlation 317
McNemar's Test for Paired Samples 317; Cochran Q Test 318

24. Which Statistical Test to Use? 321
Summary of Statistical Tests 322

25. Special Considerations about Inferential Issues in Biostatistics 327
Cause-Effect Relationship: Is it Really True? 328; Bias 329
Confounding 329; Spurious Relationship 331; Effect Modification 331
Bradford Hill Causality Criteria 332; Exposure-Disease Association 333
Odds Ratio 334; Attributable Risk 335

26. Measurement and Error Analysis 337
Measurement 337; Levels of Measurement 338
Evaluating Measurement 340; Reliability v/s Validity 343
Assessment of Validity: Specificity and Sensitivity 344
Errors in Measurement 350

Section 7: Other Statistical Concepts Frequently Used in Research

27. Vital (Demographic) Statistics and Life Tables 357
Basics of Vital Statistics 357; Life Tables 367
Survival Analysis and Kaplan-Meier Curves 374; Log-Rank Test 378

28. Time Series Analysis 381
Time Series Components 382; Measuring the Components of Time Series 384

29. Interpolation, Extrapolation and Forecasting Methods 398
Terminology 399; Methods of Interpolation 400
Extrapolation and Forecasting 406

Section 8: Statistical Concepts for Medical Administration

30. Index Numbers 411
Key Decisions in Creating Index Number 412; Weighted Index Numbers 417
Quantity and Value Index Numbers 423; Chain Index Numbers 423
Base Shifting and Splicing 426; Index Number Tests 427

31. Statistical Quality Control 429
Control Charts 430; Types of Control Charts 431
Charts based on Actual Measurements 432
'C-Control Chart' for Number of Defects Per Unit 435
P-Control Chart (Fraction Defectives or Proportion of Defects) 436
Acceptance Sampling 437

32. Decision Theory 440
Notation/Terminology 441; Decisions Methods 443
Principles of Decision Making 444; Decision Tree Analysis or Tree Diagram 449

Section 9: Report Writing and Applying for Grants

33. Research Report Writing: How to do? 453
Organization of the Research Report 453
Manuscript Preparation for Journals 460

34. Applying for Grants **467**
Preparing for Application Process 468
Ground Reality: The Background Check 469
Main Application: Contents and Pitfalls 470
Background and Significance or Introduction 471
Preliminary Studies/Progress Report 471; Research Design and Methods 471
Results 472; Monitoring and Evaluation 472
Protection of Human Subjects and Institutional Review Boards 473
Bibliography 474; Contracts 474; Abstracts 474; Title 474
Biographical Sketches 474; Budget 475
Formatting and Instructions to Applicants 475
Cover Letter 476; Decision Process Explained 476; Pay Lines 477
Outcomes 477; Common Problems Encountered 478;
Revision of Application 479; Voila! Manna from Heaven: The Funding 480
Records and Accounting 480

Appendix **481**
Oxford Centre for Evidence-Based Medicine 2011 Levels of Evidence 482
Random Number Table 484; Binomial Coefficients 485
Binomial Probabilities 486
$e^{-\lambda}$ *Values for Calculating Poisson Probabilities for* $(0 < \lambda < 1)$ 490
Area Under the Standard Normal Curve 491
Area Under the Standard Normal Curve 493
Area Under the Standard Normal Curve 495
Critical Values of 't' 497; Critical Values of Chi Square (χ^2) *498*
Critical Values of F (0.05 or 5%) 500; Critical Values of F (0.01 or 1%) 503
Factors for Construction of Control Charts (Statistical Quality Control) 506
Studentized Range: Critical Values 508
Studentized Range: Critical Values 510
Pearson's Correlation Coefficient (r): Critical Values 512
Spearman Rank Correlation Coefficient (ρ)*: Critical Values 513*
Run Test: Acceptance Region for Values of 'R' 514
Sign Test: Critical Values of 'T' 515
Kolmogorov-Smirnov Test: Critical Values of 'D' 517
Wilcoxon-Wilcox Two-Sided Test: Critical Values 518
Mann-Whitney Test (U Test): Critical Values of 'U' 521
Critical Values of τ*: Kendall Rank Correlation Significance Test 522*
Wilcoxon Signed Rank Test 'W': Lower and Upper Critical Values 523
Common Logarithms ($\log_{10}x$) *524; Antilogarithms 530*

Index **537**
