Contents

SECTION I: Research Process

1. What is Research **3**

2. Health System Research **8**

3. Research Process and Research Integrity **12**

SECTION II: Developing a Research Proposal

4. Introduction and Rationale **17**

4.1 Identification of the Problem/Research Questions and Deciding a Topic 17
4.2 Writing the Statement of the Problem 20
4.3 Rationale 21
4.4 Title 22

5. Objectives **23**

5.1 Criteria of Good Objectives 24
5.2 General and Specific Objective 25

6. Research Methods **27**

6.1 Study Types and Design 27
6.1.1 Descriptive or Analytical 32
6.1.2 Observational or Experimental 33
6.1.3 Prospective or Retrospective 34
6.1.4 Longitudinal or Cross-sectional 34
6.2 Study Population and Sampling 34
6.2.1 Non-probability Sampling 35
6.2.2 Probability Sampling 35
6.2.3 Exclusion/Inclusion Criteria for Study Subjects 35
6.3 Variables and Operational Definitions 36
6.3.1 Categorical and Numerical Variable 40
6.3.2 Raw and Derived Variable 43
6.3.3 Exposure and Outcome Variable 44

6.4 Data Collection Procedures and Tools 44
6.4.1 Using available information 45
6.4.2 Observing 45
6.4.3 Interviewing 46
6.5 Plan for Data Processing and Analysis 46

7. Ethical Considerations 48
7.1 Benefits 48
7.2 Informed Consent 49
7.3 Protection of Participants 50
7.4 Privacy 50

8. Budget and Time Frame 52

9. References 54

SECTION III: Doing the Research

10. Study Types 59
10.1 Ecological Study 60
10.2 Case Report and Case Series 61
10.3 Cross-sectional Study 62
10.3.1 Need Assessment 62
10.3.2 Estimation of Sensitivity and Specificity (Diagnostic Accuracy) 62
10.3.3 Studies of Measurement of Validity, Reliability and Agreement 62
10.3.4 Surveillance Studies 63
10.3.5 Prevalence Study and Social Survey 63
10.4 Case-control study 70
10.4.1 Definition and Selection of Cases 71
10.4.2 Selection of Controls 72
10.4.3 Ascertainment of Disease and Exposure Status 73
10.5 Cohort Study 74
10.6 Randomized Control Trial (RCT) 78
10.7 Relation Among three Observational Study Designs 82

11. Sampling and Sample Size Determination 88
11.1 Sampling 88
11.1.1 Probability Sampling 88
11.1.2 Non-probability Sampling 97
11.2 Sample Size Calculations 98
11.2.1 Factors Affecting Sample Size Calculation 98
11.2.2 Concepts and Steps of Sample Size Calculation 100
11.2.3 Sample Size Calculation Examples 103

12. Data Collection and Measurement 107
12.1 Qualitative, Quantitative and Mixed Method 107
12.2 Quantitative Data Collection 111
12.2.1 Questionnaire 111
12.2.2 Questionnaire Design and Development 113
12.2.3 Interview Techniques 117
12.3 Validity and Reliability 118
12.3.1 Evaluating Validity 121
12.3.2 Evaluating Reliability 123
12.4 Sensitivity and Specificity 124
12.5 Bias in Data Collection 126
12.5.1 Defective Instruments 126
12.5.2 Observer Bias 126
12.5.3 Effect of the Interview on the Informant 127
12.5.4 Information Bias 127

13. Data Analysis I: Descriptive Statistics 128
13.1 Data Presentation 128
13.1.1 Univariate Case 129
13.1.2 Bivariate Case 138
13.2 Data summarization 144
13.2.1 Categorical Variable 144
13.2.2 Continuous Variables 150
13.3 Analysis Exercises for One Variable 177

14. Data Analysis II: Inferential Statistics 181
14.1 Data Analysis and Inference Process 181
14.2 Univariable Analysis and Association 183

14.2.1 Measuring Association: Comparing Two Proportions 185
14.3 Validity of the Association: Ruling Out Chance, Bias and Confounding 197
14.3.1 Bias 198
14.3.2 Confounding 198
14.3.3 Chance and Statistical Inference 198
14.4 Validity and Generalizability 206
14.5 Analysis Exercises (Bivariate Association) for Two Variables 207

15. Data Analysis III: Choosing Statistical Tests 209

15.1 Basis for Identifying A Suitable Statistical Test 209
15.1.1 Outcome Variable is Continuous 215
15.1.2 Outcome Variable is Binary
15.1.3 Outcome Variable is Rate 261
15.1.4 Outcome Variable is Survival Time (Time to Event) 262
15.1.5 When the Data are Clustered 267
15.2 Determining Analysis Plan: Statistical Modelling 267
15.2.1 Start by Exploring the Data: Descriptive and Univariable Analyses 269
15.2.2 Build Regression Model, Assess the Assumptions and Fit of the Model (by Means of R^2) and Interpret the Results 270
15.3 Analysis Exercises for Statistical Tests (one, two or several variables) 302

16. Bias 307

16.1 Selection Bias 307
16.2 Information Bias 308
16.3 Confounding Bias 308
16.3.1 Control of Confounding 309
16.3.2 Confounding, Mediating (Intermediate) and Moderator (Effect Modifier) Variable 310

SECTION IV: Reporting the Research

17. Writing Process **315**
17.1 Start Writing Today 315
17.2 General Writing Tips 316
17.2.1 Clarity, Coherence, and Conciseness 316
17.2.2 Being Critical 318
17.2.3 Paraphrasing and Quoting 318

18. Writing a Manuscript **321**
18.1 Abstract 321
18.2 Introduction 324
18.3 Materials and Methods 325
18.4 Results 326
18.4.1 Initial Analyses (Univariable) 328
18.4.2 Bivariate Analyses/Univariable Analyses 330
18.4.3 Multivariableanalyses 330
18.5 Discussions 331
18.6 Conclusions 333
18.7 References 333
18.7.1 Plagiarism and Referencing 333
18.7.2 How to Reference 334

19. Critical Appraisals and Literature Review **346**
19.1 Critical Appraisals and Publication Guidelines 346
19.2 Literature Review 349
19.2.1 Where to Look for Literature? 349
19.2.2 Doing Literature Review: Systematic Review and Meta Analysis 351

20. Appendices **356**
20.1 Solutions to Data Analysis Exercises 356
20.1.1 Analysis Exercises for One Variable 356
20.1.2 Analysis Exercises for Two Variables 367
20.1.3 Analysis Exercises for Statistical Tests 371
20.1.4 Summary of STATA and SPSS Menu for Data Analysis 384

20.2 Publication guidelines 392
20.2.1 STROBE Statement 392
20.2.2 PRISMA 395
20.3 Sample Size Calculation Tables 398
20.3.1 Specified Absolute Precision for a Population Proportion, Source (Lwanga and Lemeshow 1990) 398
20.3.2 Hypothesis Test for Two Population Proportions, Source (Lwanga and Lemeshow 1990) 399
20.4 An example of Questionnaire 399
20.5 Ethics 418
20.5.1 Participant Information Sheet 418
20.5.2 Consent Form 420
