Contents

Section 1: Hemoglobinopathies, Red Cell Enzymopathies and Membranopathies

Malay Mukherjee, Anita Nadkarni, Prabhakar Kedar, Prashant Warang, Priya Hariharan, Pallavi Mehta

1.1 Laboratory Investigation of Hemoglobinopathies ***3***
1.2 Laboratory Investigation of Red Cell Enzymopathies and Membranopathies ***33***
1.3 Molecular Biology Protocols for Detection of Hemoglobinopathies ***48***
1.4 Molecular Biology Protocols for Detection of Red Cell Enzymopathies and Red Cell Membranopathies ***73***

Section 2: Hemostasis and Thrombosis

Shrimati Dharmapal Shetty, Bipin Kulkarni, Rucha Patil, Sharda Shanbhag, Nikesh Kawankar

2.1 Laboratory Diagnosis of Bleeding Disorders ***85***
2.2 Genetic Diagnosis of Bleeding Disorders ***123***
2.3 Thrombophilia Investigations ***167***

Section 3: Transfusion Medicine

Ajit Gorakshakar, Swati Kulkarni, Seema Jadhav, Disha Purchure, Harita Gogri, Roshan Shaikh, Ajaykumar Donta

3.1 Serological Diagnosis ***203***
3.2 Genotyping in Transfusion Medicine ***244***

Section 4: Transfusion Transmitted Disorders

Aruna Shankarkumar, Bhavik Dalal

4.1 Hepatitis C Virus Viral Load ***259***
4.2 Hepatitis C Virus Genotyping ***260***
4.3 Anti-HBc ELISA ***262***
4.4 Human Immunodeficiency Virus Viral Load ***262***
4.5 Hepatitis B Virus DNA Quantitation ***263***
4.6 Anti-HBs Quantitative ELISA ***263***
4.7 Hepatitis B Surface Antigen ELISA ***264***
4.8 HBeAg ELISA ***264***

Section 5: Autoimmune Disorders

Vandana Pradhan

5.1 Sample Acceptance, Rejection, Collection and Processing ***267***
5.2 Indirect Immunofluorescence Assay ***268***

5.3 Line Immunoassay: Antinuclear Antibodies (ANA) Blot ***270***
5.4 Rheumatic Factor Detection and Quantification ***272***
5.5 Anticyclic Citrullinated Peptide (CCP) Antibodies Test ***273***
5.6 Troubleshooting ***274***
5.7 Case Illustrations ***275***

Section 6: Cytogenetics

Babu Rao Vundinti, Seema Korgaonkar, Somprakash Dhangar
6.1 Cytogenetics Laboratory Setup ***283***
6.2 Human Chromosome Preparation ***284***
6.3 Fluorescence *in Situ* Hybridization Using Bacterial Artificial Chromosome, P1-derived Artificial Chromosome and P1 Clones ***287***
6.4 DNA Spectral Karyotyping ***294***
6.5 Diagnosis and Monitoring of Chronic Myeloid Leukemia (CML) ***297***
6.6 Diagnostic Workup for Myelodysplastic Syndrome (MDS) ***303***
6.7 Fanconi Anemia (FA) Workup ***306***
6.8 Aplastic Anemia Investigations ***313***

Section 7: Primary Immunodeficiency Disorders

Manisha Madkaikar, Maya Gupta
7.1 Diagnostic Approach to Primary Immunodeficiency Disorders ***319***
7.2 Recognizing Clinical Manifestations of Primary Immunodeficiency Disorders ***320***
7.3 Laboratory Approach to Primary Immunodeficiency Disorders ***322***
7.4 Primary Immunodeficiency Screening ***325***
7.5 Evaluation of Suspected Combined T- and B-cell Immunodeficiency ***326***
7.6 Evaluation of Patients with B-cell Defect ***339***
7.7 Evaluation of Patients with Phagocytic Defects ***352***
7.8 Evaluation of Patients with Intrinsic and Innate Immunity Defects: Mendelian Susceptibility to Mycobacterial Diseases Workup ***364***
7.9 Evaluation of Patients with Immune Dysregulation ***375***
7.10 Evaluation of Patients with Complement Deficiency ***386***
7.11 Molecular Analysis of Primary Immunodeficiency Disorders ***387***

Appendices

Appendix 1: Abbreviations ***391***
Appendix 2: Preparation of Common Laboratory Reagents ***401***
Appendix 3: Primer Sequences ***416***
Appendix 4: General Molecular Biology Protocols ***468***
Appendix 5: Suggested Reading ***486***
