Contents

SECTION 1: VENTILATION

1. RESPIRATION: APPLIED ANATOMY AND PATHOPHYSIOLOGICAL CONSIDERATIONS 3
Alex Yartsev, Yugan Mudaliar

Macroscopic and Microscopic Structural Elements of the Respiratory Tract *3*
Oral Cavity and the Pharynx *3*
Applied Anatomy and Pathophysiology of the Pulmonary Circulation *9*
Lung Volume and Capacities *11*
Applied Anatomy and Pathophysiology of Respiratory Mechanics *12*

2. OXYGEN DELIVERY DEVICES 17
Bogdan Tiru

History of Oxygen Therapy *17*
Oxygen as a Drug *17*
Goals of Oxygen Therapy *17*
Indications for Oxygen Use *17*
Oxygen Delivery *18*
Oxygen Delivery Devices *18*

3. APPROACH TO THE PATIENT WITH HYPOXEMIA 27
Aaron Lim

Case *27*
Hypoxia and Hypoxemia *27*
Oxygenation: Normal Physiology *27*
Mechanism of Hypoxemia *29*
Management *31*

4. APPROACH TO THE PATIENT WITH HYPERCAPNIA 35
Malvika Sagar, Char Ogborn, Shekhar Ghamande

Case *35*
Definition *35*
Pathophysiology *36*
Causes *37*
Clinical Features *37*
Advantages and Disadvantages of Hypercapnia *38*
Evaluation of Hypercapnia *39*
Management *41*
Impact of Hypercapnia on Outcome *43*
Future Implications *44*

5. NONINVASIVE VENTILATION 47
Zbigniew Szkulmowski, Antonio M Esquinas

Basic Principle for Noninvasive Ventilation Use *47*
Noninvasive Ventilation Use in Clinical Conditions *48*

Equipment Used in Noninvasive Ventilation *51*
Ventilation Modes Used in Noninvasive Ventilation *53*
Implementation Technique *53*
Monitoring *54*
Causes of Noninvasive Ventilation Failure *54*
Humidification of Inspiratory Air *58*
Rebreathing during Noninvasive Ventilation *58*
Oxygen Therapy during Noninvasive Ventilation *60*
Contraindications for Noninvasive Ventilation *60*

6. MECHANICAL VENTILATORS **65**
Fabrice Galia, Samir Jaber, Audrey De Jong
Brief Historical Recall of Ventilation *65*
Basic Principle of Mechanical Ventilation *65*
Gas Supply *66*
Turbine or Wall Gas *66*
Triggering *67*
Cycling *68*
Circuit *68*
Ventilation in ICU *68*
Ventilation Apart ICU *71*
Evolution of Mechanical Ventilation *73*
NAVA® and PAV+® *73*
Intellivent-ASV® and SmartCare® *74*
Usability *74*

7. MECHANICAL VENTILATION IN SPECIFIC CLINICAL SCENARIOS **77**
Afzal Azim
Obstructive Airway Diseases *77*
Bronchial Asthma *77*
Chronic Obstructive Pulmonary Disease *82*
Bronchopleural Fistula *83*
Severe Metabolic Acidosis *84*
Acute Respiratory Distress Syndrome *85*

8. GRAPHIC ANALYSIS OF MECHANICAL VENTILATION **90**
Daniel Arellano Sepúlveda
Basic Concepts *90*
Curves *90*
Loops *91*
Nomenclature *91*
Curves Interpretation *93*
Loops Analysis *100*

9. PATIENT-VENTILATOR ASYNCHRONY **107**
Daniel Arellano Sepúlveda, Ivan Ramírez Venegas
Asynchrony Index *107*
Impact of Asynchrony on Patient Outcome *107*
Types of Asynchrony *108*

10. MONITORING O_2 AND CO_2 DURING MECHANICAL VENTILATION 114
András Lovas, Zsolt Molnár
Oxygen Measurement *114*
Carbion Dioxide Measurement *117*

11. LUNG RECRUITMENT MANEUVERS 121
Abdul Wahab, Shalini Donthi, Salim Surani, Rahul Kashyap
Definition of Recruitment Maneuvers *121*
Methods of Recruitment Maneuvers *121*
Advantages and Disadvantages of Recruitment Maneuvers *123*
Recruitment Maneuvers and Peep Titration *123*
Derecruitment *124*
Recruitment Maneuvers and Ventilator-induced Lung Injury *124*
Future Trials and Future Directions *124*

12. HEART LUNG INTERACTIONS DURING MECHANICAL VENTILATION 128
JV Divatia, Jacob George Pulinilkunnathil
Case *128*
Determinants of Heart-lung Interaction *128*
Hemodynamic Effects due to Changes in Intrathoracic Pressure *129*
Hemodynamic Effects due to Changes in Lung Volume *130*
Hemodynamic Effects due to Ventricular Interdependence *131*
Clinical Applications of Heart-lung Interaction *131*

13. MONITORING PRESSURES DURING MECHANICAL VENTILATION 137
Nadia Corcione, Marco Albanese, Elena Spinelli, Tommaso Mauri
Airway Pressure *137*
Peak and Plateau Pressure *137*
Mean Airway Pressure *138*
Positive End-expiratory Pressure *138*
Driving Pressure *141*
Esophageal and Transpulmonary Pressure *141*
Lung Stress and Strain *141*
Inspiratory Pressure during Spontaneous Breathing *142*

14. INSPIRATORY EFFORT ASSESSMENT IN VENTILATED PATIENT 144
Sai Saran PV
Assessment of Inspiratory Efforts in Ventilated Patients *144*

15. VENTILATOR-INDUCED LUNG INJURY 151
Renata de Souza Mendes, Pedro Leme Silva, Paolo Pelosi, Patricia RM Rocco
Spontaneous Breathing: How does it Work? *151*
Pathophysiology of Vili: Stress, Strain, and Stress Raisers *152*
Principles of Mechanical Ventilation and Potential Mechanisms of Injury *153*

16. VENTILATOR-INDUCED DIAPHRAGM DYSFUNCTION 161
Tom Schepens, Ewan C Goligher
Diaphragm Anatomy and Function *161*
Diaphragm Dysfunction in the ICU *162*
Pathophysiology of Ventilator-induced Diaphragm Dysfunction *163*

Clinical Presentation and Diagnosis of Ventilator-induced Diaphragm Dysfunction *165*
Prevention of Ventilator-induced Diaphragm Dysfunction *166*
Recovery From Ventilator-induced Diaphragm Dysfunction *167*

17. WEANING FROM MECHANICAL VENTILATION **172**
Abhay Vakil, Bryan Anderson, Kirtivardhan Vashistha, Rahul Kashyap
Definitions *172*
General Approach *172*
Weaning after Prolong Mechanical Ventilation *178*

18. AEROSOL DRUG DELIVERY IN VENTILATED PATIENT **181**
O Kalchiem-Dekel, MG Allison, A Sachdeva
Factors Affecting Adequate Aerosol Delivery in Mechanical Ventilated Patients *181*
Aerosol Delivery Devices and their Integration into the Ventilator Circuit *184*
Aerosolized Drugs and their Use in Ventilator-supported Patients *188*
Aerosolized Therapy in Patients Receiving Noninvasive Ventilation *191*
Aerosolized Therapy in Patients Receiving High-flow Nasal Cannula *192*

19. EXTRACORPOREAL MEMBRANE OXYGENATION **196**
Nirvik Pal, Patricia A Nicolato, Sarah L Wachter
History *196*
Indications *196*
Pathophysiology of Gas Exchange *197*
Types and Basic Principles of Extracorporeal Membrane Oxygenation *200*
Management of Extracorporeal Membrane Oxygenation *202*
Troubleshooting during Conduct of Extracorporeal Membrane Oxygenation *206*
Weaning *207*
Complications *207*
How I do it—By Dr P Nicolato *207*

20. EXTRACORPOREAL MEMBRANE CARBON DIOXIDE REMOVAL **213**
Pramod K Guru, Anjali Agarwal, Devang Sanghavi
Extracorporeal Principles and Types *213*
Unmet Needs: Problems in Relation to the Current Standard of Care *216*
Clinical Application of Extracorporeal CO_2 Removal *217*
Challenges of the Current Devices and Methods *218*

21. HIGH FREQUENCY OSCILLATORY VENTILATION **220**
Albert Phan Nguyen, Ulrich H Schmidt
Principles and Clinical Applications *220*
Advantages and Disadvantages of HFOV *222*
HFOV in Adult and Pediatric Population *222*

22. DOMICILIARY AND PALLIATIVE VENTILATION **224**
Saurabh Vig
Patient Selection for Domiciliary Ventilation *224*
Setting Up the Hardware—Ventilator Selection *225*
Preparation for Discharge at Home *227*
Follow-up and Evaluation *230*

SECTION 2: FLUIDS AND ELECTROLYTES

23. BODY FLUID HOMEOSTASIS 235
Anumeha Bhagat
Daily Water Flux in the Body *235*
Body Fluid Compartments *235*
Measurement of Body Fluid Spaces *237*
Regulation of Extracellular Fluid Composition and Volume *238*

24. INTRAVENOUS FLUIDS 243
Nilanchal Chakraborty, Addy Yh Tan
Classification of Fluids *243*
Crystalloids *243*
Colloids *247*

25. APPROACH TO THE PATIENT WITH HYPOVOLEMIA 251
Tom Carmeliet, Robert Wise, Jan Van der Mullen, Manu Malbrain
Case *251*
Definitions *252*
Etiology of Hypovolemia *253*
Consequences of Hypovolemia *253*
Approach to Hypovolemic Patient *253*

26. FLUID THERAPY FOR SPECIFIC CLINICAL CONDITIONS 266
Ram Baalachandran, Rahul Nanchal
Pathophysiology *266*
Adverse Effects of Fluids *268*
Choices of Intravenous Fluids *269*
Infusion Strategies—Bolus versus Maintenance *269*
Fluid Therapy in Specific Circumstances *270*

27. APPROACH TO THE PATIENT WITH HYPONATREMIA AND HYPERNATREMIA 275
Dharmendra Bhadauria, Harsh Vardhan
Sodium Homeostasis *275*
Water Balance *276*
Hyponatremia *276*
Hypernatremia *283*

28. APPROACH TO THE PATIENT WITH HYPOKALEMIA AND HYPERKALEMIA 288
Diego Luis Carrillo-Pérez, Gerardo Gamba
Potassium Homeostasis *288*
Hypokalemia *288*
Hyperkalemia *291*

29. APPROACH TO THE PATIENT WITH HYPOCALCEMIA AND HYPERCALCEMIA 296
Bhuvana Krishna, Sriram Sampath
Calcium Homeostasis *296*
Hypocalcemia *297*
Hypercalcemia *302*

30. APPROACH TO THE PATIENT WITH HYPOPHOSPHATEMIA AND HYPERPHOSPHATEMIA **307**
Nasirul J Ekbal, Andrew Davenport, Banwari Agarwal
Phosphate Homeostasis *307*
Hypophosphatemia *307*
Hyperphosphatemia *310*

31. APPROACH TO THE PATIENT WITH HYPOMAGNESEMIA AND HYPERMAGNESEMIA **314**
Dharshan Rangaswamy
Magnesium Homeostasis *314*
Hypomagnesemia *315*
Hypermagnesemia *318*

SECTION 3: BLOOD GASES

32. ACID-BASE HOMEOSTASIS **325**
Saurabh Saigal
Acid-base Homeostasis *325*
Normal Physiological Response for Respiratory Disorders *326*
Normal Physiological Response for Metabolic Disorders *328*

33. APPROACH TO THE PATIENT WITH METABOLIC ACIDOSIS AND ALKALOSIS **329**
Jeroen Tahon, Niels Van Regenmortel
Approach to the Patient with Metabolic Acid-base Disorders *329*
Metabolic Acidosis *333*
Metabolic Alkalosis *337*

34. APPROACH TO THE PATIENT WITH RESPIRATORY ACIDOSIS AND ALKALOSIS **342**
John Botha, Ravindranath Tiruvoipati
Respiratory Acidosis *342*
Respiratory Alkalosis *345*

35. BASICS OF ARTERIAL BLOOD GAS INTERPRETATION **348**
Roop Kishen
Why Measure ABG? *348*
General Principles and Technical Aspects *348*
Interpreting ABG (With Emphasis on Interpreting Acid-base Disturbances) *349*
Corrections and Concordance: Do we Really Need them? *353*

36. ARTERIAL BLOOD GAS INTERPRETATION IN CLINICAL PRACTICE **355**
Roop Kishen
Arterial Blood Gas Interpretation in Clinical Practice *355*
Steps in Interpreting Arterial Blood Gas Results *355*
Do we Need Different Approaches for Arterial Blood Gas Interpretation? *360*

SECTION 4: MISCELLANEOUS

37. ENTERAL AND PARENTERAL NUTRITION IN THE ICU **365**
Mark W Motejunas, Bethany Menard, Louis Anzalone, Cody M Koress, Mark R Jones, Alan D Kaye
Indications for Therapy *365*
Enteral Nutrition *366*

Parenteral Nutrition *368*
Adjunctive Therapies *368*
Drug Interactions *369*
Side Effects and Complications *370*

38. IMMUNONUTRITION, VITAMINS, AND TRACE ELEMENTS IN THE ICU **373**
Samir Samal, Shakti Bedanta Mishra, Snigdha Ipsita
Immunonutrition *373*
Macronutrients *374*
Micronutrients: Vitamins *377*
Trace Elements *381*

39. TRANSFUSION OF BLOOD PRODUCTS IN CRITICALLY ILL ADULT PATIENTS **387**
Armin Ahmed
Packed Red Blood Cells *387*
Fresh Frozen Plasma *389*
Cryoprecipitate *391*
Prothrombin Complex Concentrate *391*
Platelet Transfusion *392*
Massive Transfusion *393*
Blood Transfusion Reaction *393*

40. CARE FOR THE POTENTIAL ORGAN DONOR IN THE ICU **396**
Pranav Jetley, Kapil Dev Soni
Donation after Neurological (Brain) Death *396*
Donation after Cardiac Death *398*
Effects of Brain Death *399*
Management of Potential Organ Donor after Brain Death *400*

INDEX ***405***
