Contents

1. Infection Control in Neonatal Intensive Care Unit 1
Infrastructure Related Measures 1
Policy Related Measures 2
Disinfectants and Germicides 2
Fumigation Policy 4
House-keeping Routines 5
Disinfection/Sterilization of Equipment and Instruments 5
Precautions in Newborn Care 9
Waste Disposal 11

2. Hand Hygiene 13
My Five Moments for Hand Hygiene 13
Methods for Hand Hygiene 14
Steps of Handwashing 14
Steps of Hand-rubbing 15

3. Preparation for Birth of a Baby 17

4. Neonatal Resuscitation 19
Prerequisites 19
Highlights 20
Evaluations 20
Actions 22
Stepwise Approach to Resuscitation 31
What to do further if still there is No/Incomplete Response? 33
When to Discontinue Resuscitation Efforts? 33
Conditions in Which it May be Ethical not to Initiate Resuscitation 33
Management of Meconium Stained Amniotic Fluid (MSAF) Delivery 34
Postresuscitation Care 35

5. Immediate Postnatal Assessment 37
Assessment for Perinatal Transition 37
Assessment for Medical Condition 38
Indications of Transfer to Neonatal Intensive Care Unit (NICU) 38

6. Care of a Well Newborn 40

7. Monitoring in a Sick Neonate **42**
Aspects of Care in any Sick Neonate 42
Clinical Monitoring 42
Laboratory Monitoring 43
Electronic Monitoring 43
Some Important Alarm Settings 44

8. Disorders of Weight and Gestation **45**
Gestational Age Assessment 45
Parameters for Nutritional Assessment 48
Important Definitions 49
Risk Concerns over the Disorders of Weight and Gestation 51

9. Thermoregulation in Newborn **54**
Modes of Heat Loss in Newborn 54
Thermogenesis in a Newborn 55
Thermoneutral Zone 55
Measurement of the Temperature and Its Interpretation 55

10. Thermal Disturbances **57**
Hypothermia/Cold Stress 57
Definitions 57
Causes/Risk Factors 57
Pathophysiology 58
Clinical Features 58
Prevention 59
Warm Chain 61
Management of Cold Stress 61
Management of Hypothermia 62
Some Useful Tips for the Use of Radiant Warmers 63
Hazards of External Heating Devices 63

Hyperthermia 64
Definition 64
Causes/Risk Factors 64
Clinical Features 64
Management 64

11. Neonatal Transport **65**
Types of Transport 65
Indications of Transport 65
Components of Transport Process 67
SAFER Transport Like a NEST 68

12. Fluid Homeostasis and Derangements **69**
Highlights 69
Calculation of Daily Fluid Requirements 70
Monitoring in a Newborn for Fluid Homeostasis 71
Guidance to Fluid Management 73
Derangements 73
Hypovolemia (Dehydration) 73
Hypervolemia (Fluid Overload) 74

13. Disorders of Sodium and Potassium Balance **76**
Hyponatremia 76
Hypernatremia 78
Hypokalemia 80
Hyperkalemia 81

14. Interpretation of Blood Gases **84**
Normal Arterial Blood Gas Parameters 84
Capillary and Venous Blood Gas Parameters 84
Interpretation of Abnormal Parameter/s 85

15. Metabolic Acidosis **86**
Blood Gas Picture in Metabolic Acidosis 86
Causes 86
Clinical Features 87
Treatment 87

16. Enteral Nutrition **89**
Enteral Feeding Options 89
Nutritional Composition of Various Milks 89
Volume of Milk Required 90
Enteral vs Parenteral Feeding 90
Routes for Enteral Feeding 91
Choice of Initial Enteral Feeding Method 91
Non-nutritive Sucking 92
Progression of Enteral Feedings 92
Monitoring and Management for Feed Intolerance 93
Minimum Enteral Nutrition 95

17. Breast and Breast Milk Feeding **96**
Important Definitions (WHO) 96
Benefits of Breastfeeding 97
Optimum Technique of Breastfeeding 98

Clinical Assessment for Adequacy of Breastfeeding 100
Objective Assessment for Breast Milk Intake 101
Not Enough Milk 102
Expression of Breast Milk 104
Breastfeeding Policy 104
Breast Related Problems 105
Contraindications for Breast Milk Feeding 107

18. Low Birth Weight Care 110

19. Nutritional Supplementation 112
Nutritional Goals in Low Birth Weight Babies 112
Recommended Daily Allowance in Neonates 112
Guide to Nutrient Supplementation in Neonates 113

20. Parenteral Nutrition 118
Indications 118
Daily Requirements of Calories and Proteins 118
Preparations and Prescription 119
Route for Parenteral Nutrition 122
Starting up a Parenteral Solution 122
Monitoring 123
Complications 124

21. Neonatal Sepsis 125
Definition 125
Classification 125
Causes/Risk Factors for EOS 126
Causes/Risk Factors for LOS 126
Clinical Features 126
Investigations 127
Management 130

Fungal Sepsis 132
Causes/Risk Factors 132
Investigations 133
Treatment 133

22. Respiratory Distress in a Newborn 135
Definition 135
Causes 135
Assessment of Severity 136
Investigations 137

Treatment 137
Monitoring 137

23. Respiratory Support Measures 138

Definition of Respiratory Failure 138

Oxygen Therapy 138
How this Works? 138
Indications 138
Prerequisites 139
Precautions 139
Devices 139
Monitoring 140
Targets 140
Complications 140

Continuous Positive Airway Pressure (CPAP) 140
How this Works? 140
Indications 141
Prerequisites 141
Contraindications 141
Equipment 141
Patient Interfaces 142
Procedure for Administration of CPAP 142
Control Parameters and Initial Settings 143
Monitoring 143
Targets 143
Manipulations of Settings 144
Weaning 144
CPAP Failure 144
Complications 144

Mechanical Ventilation 145
How this Works? 145
Indications 145
Types 146
Modes in Conventional Ventilation and their Control Parameters 146
Optimum Ventilator Strategy 148
Initial Ventilator Settings 149
Further Manipulation in Settings 150
Monitoring 151
Targets 151
Weaning 152

Postextubation Care 152
Adjuncts to Mechanical Ventilation 153
Complications 153

24. Transient Tachypnea of Newborn 154
Causes/Risk Factors 154
Clinical Features 154
Differential Diagnosis 155
Investigations 155
Treatment 155

25. Hyaline Membrane Disease 156
Cause 156
Diagnosis 156
Management 157
Surfactant Therapy 157
Follow-up 160
Prevention of HMD 160

26. Meconium Aspiration Syndrome 162
Causes of Meconium Aspiration Syndrome 162
Pathophysiology of Meconium Aspiration Syndrome 162
Clinical Features 163
Investigations 163
Management 163
Prevention of MAS 164

27. Patent Ductus Arteriosus 165
Why Preterm Babies are at Risk? 165
Clinical Features 166
Differential Diagnosis 166
Investigations 166
Treatment 166
Consequences/Complications of Patent Ductus Arteriosus 168
Prevention of Patent Ductus Arteriosus in Preterm Neonates 169

28. Apnea 170
Definition 170
Types 170
Differential Diagnosis 171
Apnea Monitors 171
Investigations 172

Management 172

Immediate Action for Apnea Attack 172
Prevention of Further Attacks (After Initial Stabilization) 172

29. Persistant Pulmonary Hypertension 176
Pathophysiology 176
Causes 176
Diagnosis 176
Differential Diagnosis 177
Management 177

30. Chronic Lung Disease 179
Definition 179
Causes/Risk Factors 179
Pathophysiology 180
Investigations 180
Treatment 180
Prevention of Chronic Lung Disease (CLD) 182

31. Anemia 184
Physiology 184
Definition of Anemia 185
Types 185
Common Causes 186
History 186
Examination 187
Investigations and Clues to the Diagnosis 187
Treatment 188
Prevention of Anemia 192

Anemia of Prematurity 192

32. Polycythemia 194
Definition 194
Pathophysiology 194
Causes 194
Clinical Features 195
Investigations 195
Treatment 195
Partial Exchange Transfusion 196
Prevention of Polycythemia 197

33. Bleeding Neonate 198
Causes 198
Investigations 198

Diagnosis 199
Treatment 200
Prevention of Vitamin K Deficiency Bleeding 202

34. Hypoglycemia **203**
Causes/Risk Factors 203
Clinical Features 204
Investigations 204
Treatment 205

Prevention of Hypoglycemia 207

Resistant/Persistent/Intractable Hypoglycemia 207
Definition 207
Etiology 207
Treatment 208

35. Hypocalcemia **209**
Definition 209
Causes/Risk Factors 209
Clinical Features 210
Investigations 211
Treatment of Hypocalcemia 211
Specific Treatment for Late Onset Hypocalcemia 212
Prevention of Hypocalcemia 213

36. Perinatal Asphyxia **215**
Definitions 215
Clinical and Laboratory Features 216
Investigations 217
Assessment of Severity of Hypoxic Ischemic Encephalopathy 218
Goals of Management 219
Treatment 220
Monitoring 221
Other Therapeutic Options 222
Outcome, Prognosis and Follow-up 222

37. Neonatal Seizures **224**
Definitions 224
Types of Seizures 224
Conditions Mimicking Seizures 225
Causes of Neonatal Seizures 226
History and Examination 227
Investigations 227

Treatment of Seizure Activity 229
Reserved Therapeutic Options 231
Long Term Management 232
Follow-up and Prognosis 233

38. Neonatal Hyperbilirubinemia 235
Definitions 235
Methods for Bilirubin Testing 236
Physiological Hyperbilirubinemia 237
Pathological Hyperbilirubinemia 237

Indirect or Unconjugated Hyperbilirubinemia 238
Causes of Pathological Unconjugated HB 238
Breastfeeding Jaundice and Breastmilk Jaundice 238
Screening Protocol 239
Screening Methods 239
Clinical Evaluation in a Jaundiced Baby 240
Bilirubin Toxicity 240
Laboratory Evaluation 242
Treatment 242
Bilirubin Levels Considered for Phototherapy and Exchange Transfusion 243
When to Stop Phototherapy 245
Other Therapeutic Options 246
Follow-up 246

Direct or Conjugated Hyperbilirubinemia 247
Causes 247
Clinical Evaluation 248
Investigations 248
Treatment 249

39. Shock 250
Definition 250
Causes and Types of Shock 250
Clinical Features 251
Investigations 251
Treatment 251
Monitoring and the Markers of Improvement 255

40. Acute Renal Failure 256
Definition 256
Types and the Causes 256
Investigations 257

Treatment 259
Follow-up 261

41. Necrotizing Enterocolitis 262
Causes/Risk Factors 262
Pathogenesis 263
Clinical Features 263
Differential Diagnosis 264
Investigations 264
Staging 265
Treatment 266
Follow-up 268
Prevention of Necrotizing Enterocolitis 269

42. Infant of Diabetic Mother 270
Concerns in the Infants of Diabetic Mothers (IDMs) 270
Management 272
Future Risk of Diabetes Mellitus 273

43. Infant of HIV Infected Mother 274
Parent to Child Transmission 274
High-Risk Factors for Transmission 275
Aspects of Management 275
Prevention of Mother to Child Transmission of Hiv 275
Decision Over the Infant Feeding Policy 279
Diagnosis of Hiv Infection in the Infant 280
Cotrimoxazole Prophylaxis 281
Vaccination Policy 281

44. Infant of Hepatitis-B Infected Mother 282
Parent to Child Transmission 282
Aspects of Management 283
Prevention of Mother to Child Transmission of Hepatitis-B 283
Diagnosis and Treatment of Hbv Infection in the Infant 285

45. Infant of Varicella Infected Mother 286
Mother to Child Transmission 286
Prevention of Mother to Child Transmission 287
Diagnosis and Treatment of Varicella Infection in the Neonate 288
Isolation of Varicella Infected/potentially Infected Newborn 289
Isolation of Varicella Exposed Neonatal Intensive Care Unit (NICU) Staff 289

46. Infant of Tuberculosis Infected Mother 290
Mother to Child Transmission 290
Aspects of Management 290
Congenital Tuberculosis 290
Management of Asymptomatic Neonate 293

47. Inborn Errors of Metabolism 296
Classification Scheme 296
Clinical Features 297
Differential Diagnosis 297
Investigations 297
Precautions in Blood/Urine Sampling 299
Immediate Treatment 299
Long-Term Management 300
Metabolic Autopsy 301
Management of a Newborn with Sibling Suspected/Diagnosed with IEM 301
Prevention of IEM 301

48. Common Procedures on and for Neonate 303
Reminders for Any Invasive Procedure 303
Preparation of Skin for Pricks and Punctures 303
Capillary Blood Sampling 304
Collection of Blood Culture 305
Lumbar Puncture 306
Bladder Tap 308
Oronasal Suctioning 309
Insertion of Orogastric Tube 310
Endotracheal Intubation 311
Endotracheal Suctioning 313
Surfactant Therapy 315
Radial Artery Cannulation and Allen's Test 315
Blood Gas Examination 317
Umbilical Vein Cannulation 318
Double Volume Exchange Transfusion 321
Partial Exchange Transfusion 325
Umbilical Artery Cannulation 326
Central Venous Cannulation 329
Removal of Arterial/Venous Lines 333
Oxygen Therapy by Hood 334
Pulse Oximetry 334

Transcutaneous pO2 Estimation 336
Transcutaneous pco2 Estimation 337
Noninvasive Bp Monitoring 337
Phototherapy 339
Transcutaneous Bilirubinometry 341
Expression of Breast Milk 343
Katori/Cup/Paladai Feeding 345
Naso/Orogastric Feeding 347
Kangaroo Mother Care 348

49. Side-Laboratory Procedures 350
Gram Staining 350
Urine Testing for Reducing Substances 351
Micro-Esr 351
Gastric Aspirate for Polymorphs 352
Shake Test 353
Aptitude Test 354

50. Discharge Policy 355
When can a Baby be Discharged? 355
Checklist for the Discharge 355

51. High Risk Neonatal Follow-up 357
Concerns in High-Risk Babies 357
Which Babies should be Kept under Follow-up? 357
Frequency of Follow-up 358
Follow-up Procedure 359

Annexures 363
