Contents

SECTION 1: Orthopedic Cases and Viva Voce

1. Chronic Osteomyelitis 3
   Case presentation 3 • Viva voce from case 3 • Pyogenic osteomyelitis versus septic arthritis 7
2. Bony Swelling (Exostosis) 9
   Case presentation 9 • Viva voce from case 9 • Benign versus malignant bony mass 11
3. Nonunion Fracture Long Bone 12
   Case presentation 12 • Viva voce from case 12 • Fracture complications 16
4. Wrist Drop (Radial Palsy) 18
   Case presentation 18 • Viva voce from case 18 • Nerve injury pattern (Seddon classification) 23
5. Frozen Shoulder 25
   Case presentation 25 • Viva voce from case 25 • Two differentials for frozen shoulder 27
6. Cubitus Varus Deformity at Elbow (Malunited Supracondylar Fracture Humerus) 29
   Case presentation 29 • Viva voce from case 29 • Extension and flexion type of supracondylar fracture humerus 33
7. Cubitus Valgus Deformity at Elbow (Nonunion Fracture Lateral Condyle Humerus) 34
   Case presentation 34 • Viva voce from case 34 • Comparative study of lateral and medial condyle of fracture humerus 37
8. Malunited Colles' Fracture 38
   Case presentation 38 • Viva voce from case 38 • Overview of fracture around distal radius 41
9. Congenital Clubfoot 43
   Case presentation 43 • Viva voce from case 43 • Idiopathic clubfoot at a glance 47
10. Genu Varus Deformity at Knee (Osteoarthritis Knee) 49
    Case presentation 49 • Viva voce from case 49 • Comparison of tuberculous, rheumatoid, and gouty arthritis 52
11. Genu Valgus Deformity at Knee (Rickets) 55
    Case presentation 55 • Viva voce from case 55 • Different types of rickets 59
12. Nonunion Fracture Neck of Femur 61
    Case presentation 61 • Viva voce from case 61 • Fracture neck of femur vs fracture trochanter 68

SECTION 2: Some Orthopedic Appliances

13. Plaster of Paris and Different Types of Casts 73
    Plaster of Paris bandage 73 • Principle of reduction and casting 74 • **Some common plaster splintage and cast 75** • Casting in Jame's position: Radial gutter, ulnar gutter, and volar splintage with POP 75 • Scaphoid cast 75 • Thumb spica 76 • Colles' cast 76 • U-slab/cast 76 • Above elbow POP cast 76 • Shoulder spica 77 • Below knee cast and boot cast 77 • Clyindrical cast 78 • Above knee cast 78 • Patellar tendon bearing (PTB) cast 78 • Hip spica 79
14. Review of Orthopedic Tractions 80
    Bohler Braun splint (Bohler: An Austrian surgeon) 80 • Thomas splint (Robert Jones) 80 • Bohler's stirrup 81 • Steinmann pin and Denham pin 81 • Buck's pulley 82 • Traction 82 • **Some common orthopedic tractions** 85 • Bryant's/Gallow's traction 85 • Upper tibial traction 85 • Distal tibial traction 85 • Calcaneal traction 85 • Head Halter traction 86 • Pelvic traction 86 • Cervical traction by Crutchfield tong 86 • Boot and bar/derotation bar/flapper 86

15. Some Orthosis and Prosthesis 88
Basics of orthosis 88 • Some common orthosis 89 • **Basics of prosthesis 92** • Some common prosthesis 93

SECTION 3: Some Orthopedic Instruments and Implants

16. Some Common Orthopedic Instruments 97
Periosteal elevator 97 • Bone lever 97 • Osteotome, chisel, and gouge (Stille type) 98 • Bone nibbler (Rongeur) 99 • Scoop or curette (Volksmann's type) 99 • Bone holders 99 • Orthopedic pliers 101 • Mallet 102

17. Some Common Orthopedic Implants 103
Kirschner's wire 103 • Stainless steel wire 103 • Orthopedic screw 104 • Bone plates 105 • Intramedullary nails 106 • Cannulated cancellous hip screw 108 • Dynamic hip screw (DHS) plate 109 • Unipolar hip prosthesis: Austin-Moore and Thompson prosthesis 109 • Talwalkar's bipolar prosthesis 110

SECTION 4: Some Common Orthopedic Radiographs

18. Radiographs from Trauma 113
• X-ray: Fracture patterns and mechanism of injury 113 • X-ray: Stress fracture 114 • X-ray: Pathological fractures 115 • X-ray: Pediatric fracture 115 • **Review of common fractures and dislocations 116** • X-ray: Fracture clavicle 116 • X-ray: Anterior shoulder dislocation 117 • X-ray: Fracture proximal humerus 118 • X-ray: Fracture shaft humerus 118 • X-ray: Fracture supracondylar and intercondylar humerus 119 • X-ray: Posterior dislocation of elbow 119 • X-ray: Fracture radial head 120 • X-ray: Fracture olecranon process 121 • X-ray: Fracture radius and ulna 121 • X-ray: Fracture distal radius (Colles fracture) 122 • X-ray: Fracture scaphoid 123 • X-ray: Fracture base of 1st metacarpal 124 • X-ray: Dislocation of hip 124 • X-ray: Fracture neck femur 125 • X-ray: Fracture trochanter femur 126 • X-ray: Fracture shaft femur 126 • X-ray: Fracture supracondylar and intercondylar femur 127 • X-ray: Fracture patella 127 • X-ray: Fracture proximal tibia 128 • X-ray: Fracture shaft tibia and fibula 129 • X-ray: Fracture malleoli 129 • X-ray: Fracture calcaneus (Lover's fracture) 130 • X-ray: Fracture base of 5th metatarsal (Jones fracture) 130

19. Radiographs of Common Bone Tumors 132
• Description of a tumor radiograph 132 • X-ray: Osteochondroma/exostosis 134 • X-ray: Simple bone cyst and aneurysmal bone cyst 134 • X-ray: Fibrous dysplasia 135 • X-ray: Giant cell tumor 136 • X-ray: Osteosarcoma 136 • X-ray: Ewing sarcoma 137

20. Radiographs of Common Infective, Rheumatic and Metabolic Disorders 138
X-ray: Chronic osteomyelitis 138 • X-ray: Osteoarticular tuberculosis 139 • X-ray: Degenerative arthritis 139 • X-ray: Rheumatoid arthritis 140 • X-ray: Ankylosing spondylitis 141 • X-ray: Nutritional rickets 142 • X-ray: Osteomalacia 142 • X-ray: Osteoporosis 143 • X-ray: Scurvy 143 • X-ray: Loose bodies of knee 144

SECTION 5: Bones Catalogue

Bones Catalogue 147
• 1. Clavicle 147 • 2. Scapula 148 • 3. Humerus 150 • 4. Radius and ulna 152 • 5. Pelvic bone 154 • 6. Femur 157 • 7. Patella 159 • 8. Tibia and fibula 160 • 9. Typical spine 163
