CONTENTS

CHAPTER ONE

Biosafety 1

Laboratory biosafety 1
Microbiological risk-assessment 4
Laboratories biosafety levels 7
Personal protective equipment and clothing 19
Procedure of putting on personal protective equipment 20
Procedure of removal of personal protective equipment 22
Laboratory animal facilities 23
Laboratory equipment 27
Laboratory biosecurity 35
Laboratory techniques 36
Packing and transportation of infectious substances 44
Biosafety and biotechnology 49
Disinfection and sterilization 53
The biosafety officer and biosafety committee 61
Emergency services: whom to contact 63

CHAPTER TWO

Chemical Hazard 65

Chemical safety levels 65
Chemical safety symbols 68
General safety precautions 72
Chemical storage 73
Chemical storage groups 74
Disposal of chemical waste 93

CHAPTER THREE

Radioactive Materials Hazard 97

Radioactive symbol 98
Radiation measurements 99
Personal safety 102
Radioactive material storage 104
Transportation 107

CHAPTER FOUR

Biosafety–Healthcare-associated Infections and Biocides 111

Microorganisms 111
Disinfection 111

Sterilization 112
Biocides 112
Biofilm 112
Prions 114
Drug/biocide resistance 114
Efflux mechanism 114
Types of biocides 115
Sites of action of different biocides 123
Sites of action of bioshields products 124
Biosafety products of bioshields for hospitals and laboratories 124
Phlebotomy 126
INJECTA™ 126
Hand disinfection 126
Laboratory glassware cleaning and disinfection 129

CHAPTER FIVE

Healthcare Facilities: Waste Management 131
Waste classifications 132
Management of reusable instruments 138
Staff protection measures 150

Bibliography 153

Index 157
