Contents

1. Basic Concepts **1**

- Introduction to Pharmacology and its Terminology *1*
- Different Sources of Drugs *2*
- Different Dosage Forms of the Drugs *4*
- Implementation of Pharmacology in Nursing Practice *5*
- Routes of Drug Administration *7*
- Prescription Writing and Common Abbreviations *9*
- Pharmacokinetics *12*
- Pharmacodynamics *17*
- Factors Modifying Drug's Action *22*
- Adverse Drug Reaction *23*
- Therapeutic Drug Monitoring *25*
- Essential Drugs *27*
- Rational Use of Drugs *28*
- Drug Interactions *29*
- Cancer Chemotherapy *30*
- Antimicrobial Agents (AMAS) and Basic Principles of Antimicrobial Chemotherapy *33*
- Sulfonamides and Cotrimoxazole (Folate Antagonists) and Quinolones and Fluoroquinoloes (DNA Synthesis Inhibitors) *36*
- Cell Wall Synthesis Inhibitors—Penicillin, Cephalosporin, and Vancomycin *41*
- Protein Synthesis Inhibitors—Tetracycline, Chloramphenicol, Aminoglycosides, and Macrolides *45*
- Antiseptics and Disinfectants *49*
- Common Poisons and Antidotes *50*
- Chelating Agents *51*
- Vitamins, Vaccines, and Antisera *53*

2. Blood **60**

- Hematinics Used in Anemia *60*
- Antimalarial Drugs *61*

- Drugs for Visceral Leishmaniasis (Kala-azar) and Filariasis *63*
- Drugs Affecting Coagulation and Bleeding *64*

3. Respiratory System 69

- Drugs Used in Bronchial Asthma, Chronic Obstructive Pulmonary Disease and Cough *69*
- Antitubercular Drugs *73*
- Histamine and Antihistamines *79*
- Nasal Decongestants *83*

4. Musculoskeletal System 84

- Nonsteroidal Anti-inflammatory Drugs (NSAIDs) *84*
- Drugs Used in the Treatment of Rheumatoid Arthritis and Gout *87*
- Skeletal Muscle Relaxants *90*

5. Cardiovascular System 94

- Hypertension *94*
- Antianginal Drugs *98*
- Treatment of Congestive Cardiac Failure (CCF) *101*
- Drugs Used in Rheumatic Fever and Myocardial Infarction *103*
- Antiarrhythmic Drugs *105*
- Treatment of Shock *108*

6. Urinary System 112

- Urinary Antiseptics and Drugs for Urinary Tract Infection *112*
- Important Nephrotoxic Drugs *113*

7. Endocrine System 114

- Pituitary Hormones *114*
- Insulin *122*
- Oral Antidiabetic Agents *124*
- Pharmacology of Corticosteroids *126*
- Thyroid Hormones and Antithyroid Drugs *128*

- Drugs Acting on Uterine Musculature (Oxytocics and Tocolytics) *130*
- Pharmacology of Male and Female Sex Hormones *131*
- Methods of Contraception *134*
- Treatment of Sexually Transmitted Diseases *138*
- Anabolic Steroids *141*
- Calcification and Bone Turnover: Parathormone (Parathyroid Hormone), Vitamin D, and Calcitonin *141*

8. Gastrointestinal and Hepatobiliary System 145

- Drugs Used in Peptic Ulcer *145*
- Emetics and Antiemetics *146*
- Drugs Used in Constipation and Diarrhea *147*
- Antiamoebic and Antiprotozoal Drugs *150*
- Anthelmintics *151*
- Common Antispasmodics *156*
- Important Hepatotoxic Drugs *156*

9. Autonomic Nervous System 157

- Cholinergic and Anticholinergic Drugs *157*
- Adrenergic Drugs and Antiadrenergic Drugs *162*
- Mydriatics and Miotics *165*
- Local Anesthetic Agents *166*

10. Central Nervous System 169

- General Anesthetic Agents *169*
- Sedatives and Hypnotics *170*
- Anxiolytic Agents *172*
- Antidepressants and Mood Stabilizers *172*
- Antipsychotics *173*
- Antiepileptics *175*
- Opioid Analgesics *176*

11. Integumentary System 181

- Antifungal Drugs *181*
- Antiviral Drugs *184*
- Drugs Used in the Treatment of Leprosy *187*

12. Miscellaneous 189

- Emergency Medicines *189*
- Immunomodulators *195*
- Drug–Food and Drug–Drug Interactions *198*

Abbreviations *201*

Bibliography *207*

Index *209*
