CONTENTS

1. The State of the Pap Test: A Historical Perspective, from Past to Present **1**
Ossama Tawfik, Marilyn Davis

2. The Future of the Pap Test: Digitization and Cytology **6**
Ossama Tawfik
- Digital Cytopathology and Telecytology 6
  - Advantages of Telepathology 7

3. The TelePAPology™ Solution **10**
Ossama Tawfik, Marilyn Davis
- What is TelePAPology™? 10
  - Methodology 10
- Motivation for TelePAPology™ 12
  - Advantages of TelePAPology™ 13

4. TelePAPology™ and the Bethesda Reporting System **17**
Ossama Tawfik
- Normal Anatomy and Histology 17
- The Bethesda Reporting System 18
- TelePAPology™ and the Bethesda Reporting System 19

5. Specimen Adequacy, Infections and Other Benign Changes **20**
Ossama Tawfik
- Specimen Adequacy 20
- Squamous Cells 21
- Glandular Cells 22
- Benign Cellular Changes 34
  - Squamous Metaplasia 34
- Keratosis 37
- Reparative/Regenerative and Inflammatory Changes 37
- Organisms and Infections 52
  - Shift in Flora Suggestive of Bacterial Vaginosis (BV) 52
  - Fungal Organisms Morphologically Consistent with *Candida* Species 55
  - Trichomonas Vaginalis 58
  - Herpes Simplex 58
  - Cytomegalovirus (CMV) 61

6. Epithelial Abnormalities: Squamous Cells **62**
Marilee Means
- Squamous Cell Lesions of the Uterine Cervix 62
  – Atypical Squamous Cells of Undetermined Significance (ASCUS) 62
  – Low Grade Squamous Intraepithelial Lesion (LSIL) 67
  – High Grade Squamous Intraepithelial Lesion (HSIL) 74
- Squamous Cell Carcinoma 81
  – Keratinizing Type 84
  – Non-keratinizing Type 86

7. Epithelial Abnormalities: Glandular **88**
Ossama Tawfik
- Glandular lesions of the Uterine Cervix 88
- Atypical Glandular Cells of Undetermined Significance (AGUS) 89
- Endocervical Adenocarcinoma In Situ 103
- Invasive Endocervical Adenocarcinoma 105
- Endometrial Adenocarcinoma 108
- Rare Lesions and Metastatic Tumors to the Uterus 111

8. Ancillary Testing and Image Analysis **117**
Ossama Tawfik, Brian Potetz
- Human Papillomavirus Testing 117
- Diagnostic Utility of TelePAPology™ and Immunohistochemistry 118
  – p16, MIB-1 and ProExTM C Immunohistochemistry 118
- Evaluation of Atypical Glandular Cells 128
  – Evaluation of Adenocarcinomas (Endocervical vs Endometrial vs Metastatic) and Other Malignancies 128
- Utilization of Cellblocks Provides an Added Value of Performing Additional Ancillary Tests for Infectious Diseases 128
- Image Analysis 131
  – The Value of Computer-Aided Image-Based Scoring Algorithms Suitable for a Remote, Web-Based (GPS Guided) Analysis of Cellblock Preparations from Pap Samples 131
  – Performance 132
  – Software 134
  – Feature Extraction 134
  – Learning and Classification 136
