Contents

1. The Normal Skin Pattern **1**

- Findings within Stratum Corneum 3
- Findings within the Dermis 8

2. The Spongiotic and Psoriasiform Patterns **19**

- The Spongiotic Pattern 21
- Simulators of Spongiotic Dermatitis 29
- The Psoriasiform Pattern 37

3. The Interface and Perivascular/Periadnexal Patterns **45**

- The Vacuolar Pattern 47
- Interface Drug Eruption 55
- The Lichenoid Pattern 58
- The Pityriasiform Pattern 70
- The Interface and Perivascular/Periadnexal Patterns 72

4. The Blistering and Acantholytic Patterns **81**

- The Intraepidermal Blistering Pattern 85
- The Subepidermal Blistering Pattern 103

5. Follicular Processes **117**

- Infectious Bacterial Folliculitis 119
- Majocchi's Granuloma 120
- Herpes Zoster 121
- Noninfectious Causes of Folliculitis 122
- Alopecia 125

6. The Nodular and Diffuse Dermal Infiltrative Patterns **133**

- The Granulomatous Pattern 135
- The Palisading Granulomatous Pattern 167
- The Neutrophilic/Suppurative Dermatitis Pattern 172
- The Diffuse Histiocytic Dermatitis Pattern 182
- The Lymphoplasmacytic Dermatitis Pattern 192
- Dermal Infestations and Arthropod Bite Reactions 194

7. The Vasculopathic Pattern **199**

- The Occlusive Vasculopathy Pattern 201
- The Acute Vasculitis Pattern 208
- The Fibrosing Vasculitis Pattern 216
- Vasculitis with Macrophages/Granulomas 219

8. Panniculitis **223**

- Septal Panniculitis 225
- Lobular Panniculitis Lymphocytes Predominate 227
- Lobular Panniculitis—Neutrophils Predominate 229
- Lobular Panniculitis—Histiocytes Predominate 230
- Noninflammatory Panniculitides 232

9. Fibrosing Dermatitis **235**

- Diseases with Decreased Number of Fibroblasts 237
- Diseases with Increased Number of Fibroblasts 241

10. The Depositional Pattern **247**

- Deposits of Amorphous Eosinophilic Material ("Hyaline" Deposition) 249
- Amyloidoses 249
- Mucinous/Myxoid Deposits 254
- Lichen Myxedematosus 254
- Pretibial Myxedema (Localized Myxedema) 255
- Other Deposits 256
- Gout (and Pseudogout) 256
- Calcinosis Cutis (and Osteoma Cutis) 257

11. The Melanocytic Tumors **259**

- Cytologically Banal Melanocytes Confined to the Epidermis 262
- Cytologically Atypical Melanocytes Confined to the Epidermis 268
- Compound or Intradermal Neoplasms That are Cytologically Banal 272
- Compound or Intradermal Neoplasms Composed of Spindled and/or Epithelioid Melanocytes: Spitz's and Reed's Nevi 290
- Predominantly Dermal Tumors Composed of Pigment Synthesizing Melanocytes: The "Blue Nevus" Variants 293
- Compound or Intradermal Neoplasms Composed of Markedly Atypical Melanocytes 301

12. Epithelial Neoplasms **325**

- Non-Neoplastic Epidermal Proliferations 327
- Benign Keratinocytic Neoplasms 331
- Malignant Tumors Arising from Epidermis 340

13. Adnexal Neoplasms **347**

- Criteria for Sebaceous Differentiation 349
- Types of Sebaceous Neoplasms 349
- Follicular Neoplasms 354
- Follicular Neoplasms Differentiating towards Infundibulum and Isthmus 354
- Tumor of Hair Matrix 360
- Tumors of External Root Sheath 361
- Tumors of Hair Germ 362
- Tumors of Hair Mesenchyme 364
- Apocrine Neoplasms 366
- Criteria for Apocrine Differentiation 366
- Neoplasms Exhibiting Follicular-Sebaceous Apocrine Differentiation 366
- Tumors Exhibiting both Eccrine and Apocrine Variants 368
- Purely Apocrine Neoplasms 371
- Eccrine Neoplasms 373
- Criteria for Eccrine Differentiation (Diagnosis of Exclusion) 373
- Eccrine Neoplasms 373
- Cysts 376

14. The Mesenchymal Tumors **381**

- Paucicellular or Patternless Tumors 383
- The Fascicular and Storiform Tumors 399
- The Myxoid Tumors 423
- The Epithelioid Tumors 434
- The Lipomatous Tumors 444
- The Vascular Tumors 451
- The Pleomorphic Tumors 472
- The Histiocytoid Tumors 475
- The Round Cell Tumors 479

15. The Cutaneous Hematolymphoid Neoplasms **481**

- The Epidermotropic/Adnexotropic Pattern 483
- The Dermal ± Subcutaneous Pattern 492
- The Subcutaneous Pattern 509
