ACS(I) Textbook of Cutaneous & Aesthetic Surgery

ACS(I) Textbook of Cutaneous and Aesthetic Surgery is the official textbook of the Association of Cutaneous Surgeons (I). It is a comprehensive and major textbook on the subspecialty, with specific reference to its applications in Indian and South Asian skin. In its third edition, all procedures, both basic and advanced, are covered extensively by authors who are experts in the field. An important feature is the inclusion of basic topics related to the practice of dermatosurgery and aesthetic dermatology. Major highlights are sections dealing with heat and cold energy-based procedures, needle-based procedures, and procedures for pigmentation. Another unique feature is the last section on interface of dermatosurgery and cosmetology with patents, legality, academics, and market, which covers several chapters related to training and practical day-to-day aspects of the necessities that a clinic dealing with procedural dermatology has to encounter.

Highlights

- *Three thrust areas:* aesthetics, lasers, and dermatosurgery
- Eighteen sections, each dealing with a specific aspect of procedural dermatology
- A total of 140 main chapters
- Uniformity in the approach to various disorders managed by surgical and aesthetic procedures
- Tips and pearls for performing the procedures effectively and safely and obtaining best results in Indian and South Asian skin.
