Contents

1. General Principles of Pharmacology 1

Drug *1;* History of Pharmacology *1;* Route of Administration *3;* Pharmacodynamics (Mode of Action of Drugs) *6;* Drug Combinations *7;* Factors Modifying Drug Action *8;* True Tolerance *9;* Apparent or Pseudotolerance *9;* Drug Receptors *10;* Ion Channels *12;* Pharmacokinetics *13;* Absorption *14;* Distribution of Drugs *16;* Half-Life of Drugs *19;* Drug Concentration *19;* Biotransformation (Drug Metabolism) *20;* Excretion of Drugs *23;* Drug Interactions *25;* Drug Toxicity *26;* Apoptosis *27*

2. Drugs Acting on Autonomic Nervous System 28

Autonomic Nervous System *28;* Central Autonomic Connections *30;* Sympathetic System *30;* Parasympathetic System *30;* Neurohumoral Transmission *32;* Adrenergic Neurohumoral Transmission *33;* Cholinergic Neurotransmission *35;* Adrenergic Agonists (Sympathomimetics) *37;* Catecholamines *37;* Epinephrine, Norepinephrine and Isoproterenol *37;* Non-catecholamines *40;* Amphetamine *41;* Phenylephrine *41;* Methoxamine and Metaraminol *41;* Mephentermine *41;* Antiadrenergic Drugs *42;* Ergot Alkaloids *42;* Phenoxybenzamine *43;* Tolazoline *43;* Phentolamine *44;* Prazosin *44;* Yohimbine *45;* β-Adrenergic Blocking Drugs *45;* Adrenergic Neuron Blocking Drugs *49;* Cholinergic Drugs *50;* Parasympathomimetic Agents *50;* Acetylcholine *51;* Methacholine, Carbachol and Bethanechol *51;* Naturally Occurring Cholinomimetic Alkaloids *52;* Cholinesterase Inhibitors *53;* Organophosphorus Compounds *56;* Anticholinergic Drugs (Parasympatholytic Agents) *57;* Atropine, Scopolamine and Related Belladonna Alkaloids *58;* Synthetic Muscarinic Blocking Agents *59;* Selective Muscarinic Receptor Antagonists *61*

3. Drugs Acting on Central Nervous System 62

Central Nervous System *62;* Neurotransmitters *63;* General Anesthetics *63;* Stages of Anesthesia *65;* Preanesthetic Medication *66;* Administration of General Anesthetics *67;* Inhalation Anesthetics *67;* Pharmacokinetics of General Anesthetics Inhalation Anesthetics *68;* Injectable Anesthetics *69;* Inhalation Anesthetics *70;* Parenteral Anesthetics *74;* Dissociative Anesthetics *81;* Sedatives–Hypnotics *83;* Hypnotics–Sedatives *83;* Benzodiazepine Antagonist *89;* Anticonvulsants (Antiepileptic Drugs) *90;* Antiepileptic Drugs *91;* Barbiturates *91;* Deoxybarbiturates *92;* Hydantoins *93;* Benzodiazepines *94;* Iminostilbene *95;* Aliphatic Carboxylic Acid *95;* Succinides *96;* Phenyltriazine *97;* Cyclic Gaba

Analog *97;* Newer Drugs *97;* Miscellaneous Drugs *98;* Drugs Controlling Muscle Rigidity and Tremors *99;* Antipsychotic and Antianxiety Drugs *102;* Antipsychotic Drugs *102;* Phenothiazine Derivatives *102;* Butyrophenones *105;* Thioxanthenes *106;* Other Heterocyclics *107;* Tardive Dyskinesia *108;* Benzodiazepines *108;* Azapirones *110;* Sedative Antihistaminic *110;* β-Blocker *111;* Drugs for Behavioral Disorders (Antidepressant and Antimanic Drugs) *111;* Antidepressants *111;* Monoamine Oxidase Inhibitors *112;* Reversible Inhibitors of MAO-A *112;* Tricyclic Antidepressants *113;* Selective Serotonin Reuptake Inhibitors *115;* Atypical Antidepressants *116;* Antimanic Drugs (Mood Stabilizers) *117;* Hallucinogens (Psychedelics, Psychotomimetics, Psychodysleptics, Psychotogens) *117;* Opioid Analgesics and Antagonists *119;* Opioid Analgesics *119;* Other Opium Alkaloids *129;* Complex Action Opioids and Antagonists *129;* Antipyretics, Analgesics and NSAIDs *132;* Non-Selective Cox Inhibitors Salicylates *134;* Preferential COX-2 Inhibitors *146;* Selective COX-2 Inhibitors *147;* Analgesic-Antipyretic with Poor Anti-Inflammatory Action *148*; CNS Stimulants and Cerebroactive Drugs *149*

4. Drugs Acting on Peripheral (Somatic) Nervous System 154

Local Anesthetics *154;* Miscellaneous Local Anesthetics *160*

Skeletal Muscle Relaxants *160*

Neuromuscular Blocking Drugs *160*

Peripherally Acting Muscle Relaxants *164*

Neuromuscular Blocking Drugs *164;* Non-Depolarizing Neuromuscular Blocking Drugs *164;* Depolarizing Neuromuscular Blocking Drugs *167;* Directly Acting Muscle Relaxants *168;* Centrally Acting Muscle Relaxants *169;* Muscle Relaxant Antagonists *170*

5. Drugs Acting on Respiratory System 172

Classifications *172;* Pharyngeal Demulcents *172;* Expectorants (Mucokinetics) *173;* Mucolytics *175;* Antitussives *176;* Bronchodilators *178;* Drugs for Allergic and Inflammatory Disorders of Respiratory Tract *183;* Leukotriene Antagonists *183;* Mast Cell Stabilizers *183;* Corticosteroids *184*

6. Drugs Acting on Cardiovascular System 186

Cardiovascular Drugs *186;* Antihypertensives *191;* Ganglionic Blocking Agents *193;* Mixed Adrenergic Antagonists *194;* β-Adrenergic Blockers *194;* Antiarrhythmic Agents *200;* Antiarrhythmic Drugs *201;* Vasodilators *206*

7. Drugs Affecting Blood and Blood Formation 211

Hematinics *211*

Iron *211;* Cobalt *214;* Copper (Blue Vitriol, Roman Vitriol) *214;* Vitamin B_{12} (Cyanocobalamin, Erythrocyte Maturing Factor, Antipernicious Anemia Factor) *215;* Folic Acid *215*

Coagulants ***216***

Coagulation of Blood *216;* Coagulants (Hemostatics) *217*

Anticoagulants ***222***

In vitro Anticoagulants *222*

Hypolipoproteinemic Drugs ***228***

Physiology of Lipoproteins *228*

Plasma Volume Expanders ***234***

Blood *234*

8. Drugs Acting on Gastrointestinal System **236**

Drugs Acting on Mouth ***236***

Sialics (Sialogogues) *236;* Antisialogogues *236*

Drugs Acting on Stomach ***237***

Drugs Stimulating Gastric Secretions *237;* Drugs Inhibiting Gastric Secretions *237;* H_2 Receptor Antagonists *238;* Proton Pump Inhibitors *239;* Muscarinic Receptor Antagonists *241;* Prostaglandin Analogs *241*

Antacids ***241***

Systemic Antacids *242;* Non-Systemic Antacids *242;* Antacid Combinations *244;* Ulcer Protectives *244;* Ulcer Healing Drugs *245*

Emetics, Antiemetics and Prokinetic Drugs ***245***

Emetics *245;* Locally Acting Emetics *245;* Centrally Acting Emetics *246;* Antiemetics *247;* Locally Acting Antiemetics *248;* Centrally Acting Antiemetics *248*

Stomachic/Digestants ***253***

Digestants *253;* Stomachics *255;* Aromatic Bitters *256;* Alkaloidal Bitters *256;* Antistomachics *257;* Carminatives *257;* Antizymotics *260;* Ruminotorics *261;* Drugs for Closure of Esophageal Groove *262*

Drugs Acting on Intestine ***263***

Antispasmodics *263*

Purgatives ***264***

Bulk Purgatives *264;* Stimulant Purgatives *266;* Direct Stimulant Purgatives Diphenylmethanes 266; Resinous Cathartics 267; Fixed Oils *268;* Indirect Irritant Purgatives 268; Osmotic Purgatives 270; Fecal Softeners *272;* Docusates *272;* Neuromuscular Purgatives *272*

Antidiarrheal Drugs (Intestinal Astringents) ***273***

Non-Specific Antidiarrheal Drugs ***273***

Gastrointestinal Protectants and Adsorbents *273;* Antisecretory Drugs *274;* Antimotility Drugs *275;* Miscellaneous Drugs *276;* Intestinal Astringents *276*

Specific Antidiarrheal Drugs ***277***

Drugs Acting on Liver *277*

9. Drugs Acting on Urinary System **279**

Renal Functions and Urine Formation *279;* Diuretics *282;* High Ceiling (Loop) Diuretics *282*

Medium Efficacy Diuretics ***284***

Thiazide and Related Diuretics *284;* Carbonic Anhydrase Inhibitors *286;* Potassium Sparing Diuretics *287;* Aldosterone Antagonists *287;* Osmotic Diuretics 288; Xanthines 289; Antidiuretics 289; Synthetic Analogs 291; Thiazides 292; Miscellaneous Drugs 292

Drugs Acting on Fluid, Electrolyte and Acid-Base Balance ***292***

Acidosis *296;* Alkalosis *296;* Edema *297;* Urinary Acidifiers and Alkalinizers *297;* Urinary Acidifiers *298;* Urinary Alkalinizers (Alkalizers) *298;* Urinary Antiseptics *299*

10. Drugs Acting on Endocrine System **301**

Hormones *301;* Hormone Therapy *302;* Hormone Antagonists *303;* Antihormones *303;* Hormone Synthesis Inhibitors *303;* Pituitary Hormones *304;* Anterior Pituitary Hormones *304;* Posterior Pituitary Hormones *311;* Antidiuretic Hormone (Vasopressin) *311;* Male Sex Hormones *314;* Female Sex Hormones *319;* Antiestrogens *322;* Estrogen Receptor Inhibitors *322;* Progestins *323;* Synthetic Progestogens *325;* Antiprogestins *326;* Corticosteroids *327;* Glucocorticoids *328;* Preparations and Dose *331;* Adrenal Cortex Inhibitors *333;* Insulin and Oral Hypoglycemic Drugs *333;* Oral Hypoglycemic Drugs *337;* Sulfonylureas *337;* Meglitinide/D-Phenylalanine Analogs *339;* α-Glucosidase Inhibitors *340;* Glucagon *340;* Thyroid and Parathyroid Hormones *341;* Antithyroid Drugs *346;* Calcitonin *348;* Parathyroid Hormone (Parathormone) *348;* Melatonin *349;* Drugs Acting on Uterus *350;* Ecbolics *350;* Posterior Pituitary Hormones and Analogs *350;* Ergot Alkaloids *351;* Prostaglandins and Analogs *352;* Miscellaneous Drugs *352;* Tocolytics *353*

11. Autacoids and Related Drugs **355**

Autacoids and Related Drugs *355;* Histamine *355*

Antihistamines (Antihistaminics) ***358***

H_1 Antagonists *359;* Piperazine Group *360;* 5-Hydroxytryptamine (Serotonin) *362;* Pharmacological Actions *363;* Modulators of Serotonergic System *364;* Selective 5HT Receptor Antagonists *364;* Lipid Derived Autacoids *365;* Physiological–Pharmacological Effects *367*

Inhibitors of Eicosanoids ***370***

Inhibitors of Eicosanoid Synthesis *370;* Platelet Activating Factor *370;* Pharmacological Properties *372;* Angiotensins *372;* Angiotensin Converting Enzyme Inhibitors *374;* Angiotensin-II Receptor Antagonists *375;* Kinins *375;* Kinin and Kininase Inhibitors *377*

Drugs for Rheumatoid Arthritis and Gout ***377***

Antirheumatoid Drugs *377;* Immunosuppressants *380;* Adjuvant Drugs *380;* Drugs for Gout *380;* Drugs for Acute Gout *381;* Drugs for Chronic Gout/Hyperuricemia *381;* Uric Acid Synthesis Inhibitor *381;* Uricosuric Drugs *382;* Chondroprotective Drugs *382*

12. Antimicrobial Drugs **385**

General Considerations *385;* Mechanism of Bacterial Resistance *385;* Importance of Extra-Chromosomal Resistance Factors *386;* Antibiotics *387;* Sulfonamides, Trimethoprim and Sulfones *388;* Trimethoprim *392;* Sulfonamide and Trimethoprim *392;* Sulfones *393;* β-Lactam Antibiotics *393;* Penicillins *394;* Semisynthetic Penicillins *397;* Penicillinase Resistant Penicillins *397;* Acid Resistant Penicillins *398;* Broad Spectrum Penicillins (Extended Spectrum Penicillins) *398;* Aminopenicillins *399;* Carboxypenicillins *400;* Mecillinam (Amdinocillin) *401;* Ureidopenicillins *401;* β-Lactamase Inhibitors *401;* Cephalosporins *402;* Cephamycins *408;* Monobactams *408;* Carbapenems *409*

Broad-Spectrum Antibiotics ***409***

Tetracyclines *409;* Amphenicols *411;* Chloramphenicol *411;* Aminoglycoside Antibiotics *413;* Macrolides *419;* Semisynthetic Macrolides 421; Miscellaneous Antibiotics *423;* Polypeptide Antibiotics *424;* Oxazolidinone *426;* Quinolones *426;* Fluoroquinolones *427;* Nitrofurans *433*

Antifungal Drugs ***435***

Characteristics of an Ideal Antifungal Agent *435;* Fungal Nucleic Acid Inhibitors *436;* Inhibitor of Fungal Mitosis *437;* Inhibitors of the Ergosterol Synthesis Pathway *437;* Inhibitors of Fungal Membrane Stability *440;* Inhibitors of Fungal Cell Wall Synthesis *442;* Iodides *442;* Miscellaneous Drugs *443;* Antitubercular Drugs *444;* First Line Drugs *445;* Second Line Drugs *446*

Antiviral Drugs ***448***

Inhibitors of Viral Genome Replication *449;* Antiherpes Virus Nucleoside and Nucleotide Analogs *449;* Anti-HIV and HBV Nucleoside and Nucleotide Analogs *451;* Non-Nucleoside DNA Polymerase Inhibitors *452;* Non-Nucleoside Reverse Transcriptase Inhibitors *452;* Inhibition of Viral Mutation *452;* Inhibition of Viral Release *452;* Anti-Influenza Virus Drugs *453;* Antiviral Drugs with Unknown Mechanism of Action *453;* Drugs that Modulate the Immune System *453*

Anthelmintics ***454***

Classification of Anthelmintics *455;* Piperazine Compounds *455;* Benzimidazoles *456;* Benzimidazole Prodrugs *460;* Imidazothiazoles *461;* Tetrahydropyrimidines *462;* Pyrazinoisoquinolines and Benzazepins *463;* Macrolides *464;* Milbemycins *465;* Sulfonamides *466;* Salicylamides *466;*

Substituted Phenols *467;* Arsenicals *468;* Bromsalans *469;* Halogenated Hydrocarbons *469;* Organophosphate Anthelmintics *469;* Miscellaneous Anthelmintics *471*

Antiprotozoal Drugs *472*

Anticoccidial Drugs *472;* Sulfonamides *472;* Pyrimidines (Diaminopyrimidines) *473;* Thiamine Antagonists *473;* Symmetrical Triazinones *474;* Benzene Acetonitriles *474;* Carbanilides *475;* Benzylpurines *475;* Dinitrobenzamide *475;* Guanides *476;* Pyridinoles *476;* Polyether Antibiotics *476;* Quinazolines *478;* Nitrofurans *478;* Miscellaneous Drugs *478*

Antihistomonial Drugs *479*

Nitrothiazole Compounds *479;* Nitroimidazoles *479*

Antitrypanosomal and Antipyroplasmic Drugs *480*

Classification *480;* Aminophenanthridium Compounds *480;* Quinapyramine Compounds *481;* Carbamide Derivative *482;* Dyes *482;* Naphthoquinones *483;* Miscellaneous Drugs *483;* Drugs for Intestinal Protozoa *484;* Benzimidazoles *486*

Antimalarial Drugs *487*

Mode of Action *488*

13. Antineoplastic Drugs 493

Classification of Anticancer Drugs *493;* Alkylating Agents and Related Compounds *494;* Antimetabolites *496;* Cytotoxic Antibiotics *497;* Plant Derivatives *499;* Hormones *500;* Hormone Antagonists *500;* Miscellaneous Drugs *501;* Monoclonal Antibodies *502;* Biological Response Modifiers *502*

14. Miscellaneous Drugs 503

Drugs Acting on Skin and Mucous Membranes *503*

Demulcents *503;* Emollients *504;* Adsorbents and Protectives *504;* Astringents *505;* Irritants and Counter-Irritants *506;* Caustics and Escharotics *508;* Keratolytics and Keratoplastics *508;* Antiseborrheics *509;* Melanizing Agents *510;* Demelanizing Agents *511;*

Antiseptics and Disinfectants *511*

Properties of an Ideal Antiseptic *511;* Factors which Modify Antisepsis or Disinfection *512;* Phenolic Compounds *513;* Oxidizing Agents *514;* Reducing Agents *515;* Halogens *515*

Surface Acting Agents *517*

Anionic Surfactants *517;* Cationic Compounds *517*

Biguanides (Bisguanides) *518*

Chlorhexidine *518*

Alcohols *518*

Ethanol (Ethyl Alcohol) *518;* Isopropanol *518;* Acids *518;* Alkalies *519*

Metallic Salts *519*

Silver Compounds *519;* Mercury Compounds *520;* Zinc Compounds *520*

Dyes *520*

Acridine Dyes *520;* Rosaniline Dyes *521;* Azo Dyes *522;* Miscellaneous Agents *522;* EDTA *522;* Ectoparasiticides *522*

Insecticides *523*

Organophosphorus Compounds *523;* Carbamates *524;* Organochlorine Insecticides *525;* Formamidine Compounds *526;* Chloronicotinyl Compounds *527;* Phenylpyrazole Insecticides *527;* Herbal Insecticides *527;* Pyrethrins and Pyrethroid Insecticides *528;* Natural Compounds *528;* Synthetic Pyrethroids *528*

Avermectins and Milbemycins/Macrocyclic Lactons (For Details See Anthelmintics) *530*

Insect Growth Regulators *530;* Juvenile Hormone Analogs/ Juvenoids *530;* Chitin Synthesis Inhibitors *531;* Miscellaneous Agents *531*

Repellents and Synergists *532*

Repellents *532;* Synergists *532;* Chelating Agents and Antidotes *532;* Chelating Agents *533;* Monodentate and Bidentate Chelators *533*

Polydentate Agents *535*

EDTA and its Salts *535;* DTPA and its Salts *536;* Other Polydentate Chelators *536*

Agents Act through Enzyme Associated Reactions *537*

Enzyme Reactivators *537;* Enzyme Inhibitors *538;* Antidotes *538;* Functional Antidotes *539;* Pharmacological Antidotes *540;* Immunomodulators *541;* Immunostimulants *541;* Immunosuppressants *544*

Agents Inhibit IL-2 Production or Action *544*

Cyclosporine (Cyclosporin-A) *544;* Agents Inhibiting Cytokine Gene Expression *546;* Cytostatics *546;* Alkylating Agents *546;* Antimetabolites *546;* Cytotoxic Antibiotics *547;* Antibodies *548;* Polyclonal Antibodies *548;* Monoclonal Antibodies *548;* Synthetic Androgens *548;* Gene Therapy *549;* Methods of Gene Therapy *549*

Bibliography *551*

Index *553*
