Contents

1. Anatomy 1

Theory: Important Questions *3*, Upper Limb *3*, Lower Limb *4*, Thorax *6*, Head and Neck *7*, Neuroanatomy *8*, Abdomen and Pelvis *9*, General Anatomy *11*, Tissues *11*, Glandular Epithelium* *11*, Cartilage* *14*, Bone *14*, Periosteum* *16*, Ossification *16*, Joints* *18*, Muscular System *20*, Nervous Tissue *20*, Nerve Fiber *23*, Nerves *23*, Reflex Arc *23*, Ganglia *23*, Lymphatic System *24*, Blood Vessels *25*, Blood Supply to the Wall of Blood Vessel *25*, Nerve Supply to Blood Vessel *26*, Skin *26*, General Embryology *28*, Structure of a Mature Spermatozoan *28*, Spermatogenesis* *28*, Spermiogenesis* *29*, Menstrual Cycle *29*, Week One of Human Development *32*, Week Two of Embryo Development *34*, Development of Extraembryonic Mesoderm (Amnion) *35*, Primitive Streak* *36*, Somites* *36*, Neural Crest* *37*, Notochord* *37*, Connecting Stalk *38*, Buccopharyngeal Membrane *38*, Fetal Membrane *38*, Decidua *39*, Chorionic Villi* *39*, Placenta* *40*, Twins *41*, Monozygotic (Identical) Twins *41*, Amniocentesis *41*, Pharyngeal Arches *42*, Genetics *43*, Sex Chromatin (Barr Body)* *43*, Karyotyping* *43*, Sex-Linked Inheritance* *43*, Klinefelter's Syndrome* *44*, Turner's Syndrome* *44*, Numerical Abnormalities *44*, Down's Syndrome/Mongolism/Trisomy 21* *45*, Nondisjunction *45*, Hemophilia *45*, Osteology *47*, Upper Limb *47*, Clavicle *47*, Scapula *48*, Humerus *49*, Radius *51*, Ulna *51*, Carpal Bones *53*, Metacarpal Bones *54*, Phalanges *54*, Thorax *54*, Sternum *54*, Ribs *55*, Typical Ribs *55*, Atypical Rib *55*, Lower Limb *56*, Hip Bone *56*, Bony Pelvis *58*, Patella *60*, Tibia/Shin Bone *60*, Fibula *62*, Tarsal Bones *62*, Talus *63*, Calcaneus *63*, Skull *64*, Structures Passing through Various Foramina, Canals and Fissures of the Skull *65*, Mandible Lower Jaw *68*, Maxillae *68*, Frontal Bone *68*, Parietal Bone *69*, Temporal Bone *69*, Occipital Bone *69*, Sphenoid Bone *70*, Ethmoid Bone *70*, Structures Passing through Various Foramina in the Anterior Cranial Fossa *70*, Structures Passing through Various Canals and Foramina *71*, Posterior Cranial Fossae *71*, Structures Passing through Various Canals and Foramina *71*, Vertebrae *72*, Sacrum *72*, Sacral Canal *73*, Coccyx *74*, Radiology *75*, Standard Views of a Radiograph *75*, Upper Limb *75*, Lower Limb *76*, Thorax *78*, Head and Neck *78*, Vertebral Column *79*, Abdomen *80*, Surface Marking *82*, Upper Limb *82*, Thorax *82*, Head, Neck and Brain *83*, Lower Limb *84*, Abdomen and Pelvis *85*, Systemic Embryology *86*, Head and Neck *86*, Abdomen and Pelvis *89*, Thorax *94*, Histology *99*, Epithelium *99*, Connective Tissue *100*, Bone *101*, Compact Bone (Longitudinal Section) *101*, Muscular Tissue *101*, Lymphoid Tissue *101*, Nervous Tissue *102*, Integumentary System *102*, Blood Vessels *103*, Respiratory System *103*, Glands *103*, Digestive System *104*, Gastrointestinal Tract *104*, Small Intestine *104*, Large Intestine *105*, Urinary System *105*, Male Reproductive Tissue *106*, Female Reproductive System *106*, Mammary Gland *107*, Endocrine Glands *107*, Special Senses *108*, Histology Diagrams *109*, Epithelium *109*, Cartilage *110*, Bone *111*, Muscular Tissue *112*, Lymphoid Tissue *113*, Nervous Tissue *114*, Skin *116*, Blood Vessels *117*, Respiratory System *118*, Glands *119*, Tongue *120*, Urinary System *124*, Male Reproductive System *125*, Female Reproductive System *127*, Mammary Gland *128*, Endocrine Glands *129*, Special Senses *130*, Gross Spotters *131*, Upper Limb *131*, Lower Limb *131*, Thorax *131*, Head and Neck *131*, Brain *132*, Abdomen *132*, Clinical Questions *133*, Diagrams *136*, Upper Limb *136*, Thorax *140*, Abdomen *144*, Head and Neck *149*, Brain *153*, Lower Limb *158*, Nerves *163*

2. Physiology 167

Theory: Important Questions *169*, Hematology *169*, Cardiovascular System *169*, Respiratory System *170*, Gastrointestinal Tract *170*, Renal System *171*, Central Nervous System (CNS) *171*, Special Senses *172*, Reproductive System *172*, Endocrinology *173*, Nerve Muscle Physiology *173*, Skin and Temperature Regulation *173*, Hematology Experiments *174*, Estimation of Hemoglobin *174*, Enumerates the Red Blood Cells (RBC) *175*, Total Leukocyte Count *177*, Differential Leukocute Count *178*, Packed Cell Volume/Hematocrit *180*, Blood Indices *181*, Erythrocyte Sedimentation Rate (ESR) *182*, Blood Grouping *183*, Bleeding Time and Clotting Time *184*, Osmotic Fragility of Erythrocytes *185*, Clinical Examination *187*, Human Arterial Blood Pressure *187*, General Examination *188*, Examination of Respiratory System *190*, Examination of Cardiovascular System *192*, Examination of Sensory System *193*, Examination of Motor System *194*, Examination of Reflexes *199* Examination of Cranial Nerves *201*, Amphibian Experiments *206*, Simple Muscle Twitch *206*, Effect of Two Successive Stimuli on Muscle Contraction *207*, Fatigue and Recovery *207*, Effects of Afterload and Freeload on Muscle Contraction *208*, Genesis of Tetanus *209*, Effect of Temperature on Muscle Contraction *210*, Normal Cardiogram of Frog and Effect of Temperature on Frog's Heart *210*, Stannius Ligatures *212*, Effect of Stimulation of Vagus Nerve on Frog's Heart *213*, Spotters *214*, Skills *219*, Theory: Viva Voce *220*, Hematology *220*, Cardiovascular System *220*, Respiratory System *220*, Gastrointestinal Tract (GIT) *220*, Excretory System *221*, Central Nervous System (CNS) *221*, Special Senses *221*, Endocrinology *221*, Reproduction *222*, Nerve-Muscle Physiology *222*, Clinical Questions *223*, Normal Values *225*, Diagrams *227*, Blood *227*, Cardiovascular System *228*, Respiratory System *231*, Renal System *233*, Gastrointestinal Tract *235*, Temperature Regulation *235*, Endocrinology *236*, Central Nervous System *237*, Reproduction *240*

3. Biochemistry 241

Theory: Important Questions *243*, General Biochemistry *243*, Carbohydrates *243*, Lipids *243*, Proteins *243*, Enzymes *244*, Biological Oxidation *244*, Heme Synthesis and Breakdown and Hemoglobin *244*, Clinical Enzymology and Biomarkers *244*, Regulation of Blood Glucose, Insulin and Diabetes Mellitus *244*, Vitamins *245*, Mineral Metabolism *245*, Energy Metabolism and Nutrition *245*, Acid-Base Balance *245*, Free Radicals and Antioxidants *245*, Detoxification and Biotransformation of Xenobiotics *245*, Nucleotides *246*, DNA: Structure and Replication *246*, Transcription and Translation *246*, Molecular Genetics and Control of Gene Expression *246*, Recombinant Technology and Gene Therapy *246*, Cancer and AIDS *246*, Immune Chemistry *247*, Clinical Biochemistry *247*, Qualitative Experiments *248*, Identification of Biologically Important Substances *248*, Urine Examination *253*, Quantitative Experiments *257*, Colorimetry *257*, Estimation of Blood Sugar *257*, Estimation of Blood Urea *258*, Estimation of Serum Creatinine *259*, Estimation of Serum Proteins *259*, Estimation of Serum Albumin *260*, Spotters *262*, Reagents *262*, Tests *262*, Samples *262*, Nutrition *262*, Indicators *262*, Microscopy *262*, Instruments *263*, Diagrams *264*, Spectroscopy *265*, Graphs *266*, Theory—Viva Voce *268*, General Biochemistry *268*, Carbohydrates *268*, Lipids *268*, Proteins *268*, Enzymes *268*, Biological Oxidation *268*, Heme Synthesis and Breakdown and Hemoglobin *268*, Clinical Enzymology and Biomarkers *268*,

Regulation of Blood Glucose, Insulin and Diabetes Mellitus *268*, Vitamins *268*, Water-Soluble Vitamins *269*, Mineral Metabolism *269*, Energy Metabolism and Nutrition *269*, Acid-Base Balance *269*, Free Radicals and Antioxidants *269*, Nucleotides *269*, DNA-Structure and Replication *269*, Transcription and Translation *269*, Molecular Genetics and Control of Gene Expression *269*, Recombinant DNA Technology and Gene Therapy *269*, Cancer and Aids *269*, Immunochemistry *269*, Clinical Biochemistry *269*, Charts for Discussion *270*, Normal Values *274*, Important Pathways *276*,

Model Question Paper **285**

First MBBS Degree Model Examination—2013 *285*

Index *289*
