CONTENTS

ANATOMY

SECTION 1: GENERAL ANATOMY 3

1. Introduction 3
2. Skeleton 3
3. Joints 4
4. Muscles 5
5. Cardiovascular System 5
6. Lymphatic System 5
7. Nervous System 6
8. Skin and Fasciae 6
9. Connective Tissue, Ligaments and Raphe 6

SECTION 2: UPPER LIMB 7

10. Introduction 7
11. Bones of Upper Limb 7
12. Pectoral Region 8
13. Axilla 9
14. Back 10
15. Scapular Region 10
16. Cutaneous Nerves, Superficial Veins and Lymphatic Drainage 11
17. Arm 12
18. Forearm and Hand 13
19. Joints of Upper Limb 16
20. Miscellaneous 17

SECTION 3: THORAX 18

21. Introduction 18
22. Bones and Joints of Thorax 18
23. Walls of Thorax 18
24. Thoracic Cavity and Pleurae 20
25. Lungs 20
26. Mediastinum 22
27. Pericardium and Heart 23
28. Superior Vena Cava, Aorta and Pulmonary Trunk 25
29. Trachea, Esophagus and Thoracic Duct 25
30. Miscellaneous 26

SECTION 4: LOWER LIMB 26

31. Introduction 26
32. Bones of Lower Limb 26
33. Front of Thigh 27
34. Medial Side of Thigh 29
35. Gluteal Region 30
36. Popliteal Fossa 32
37. Back of Thigh 32
38. Front, Lateral and Medial Sides of Leg and Dorsum of Foot 33
39. Back of Leg 34
40. Sole of Foot 35
41. Venous and Lymphatic Drainage; Comparison of Lower and Upper Limbs 35
42. Joints of Lower Limb 36
43. Arches of Foot 39
44. Miscellaneous 40

SECTION 5: ABDOMEN AND PELVIS 40

45. Introduction to Abdomen and Osteology 40
46. Anterior Abdominal Wall 40
47. Male External Genital Organs 43
48. Abdominal Cavity and Peritoneum 44
49. Abdominal Part of Esophagus and Stomach 46
50. Small and Large Intestines 47
51. Large Blood Vessels of the Gut 50
52. Extrahepatic Biliary Apparatus 51
53. Spleen, Pancreas and Liver 52
54. Kidney and Ureter 54
55. Suprarenal Gland and Chromaffin System 55
56. Diaphragm 56
57. Posterior Abdominal Wall 57
58. Perineum 58
59. Preliminary Considerations of Boundaries and Contents of Pelvis 60
60. Urinary Bladder and Urethra 60
61. Female Reproductive Organs 61
62. Male Reproductive Organs 63
63. Rectum and Anal Canal 63
64. Walls of Pelvis 64

SECTION 6: HEAD AND NECK 65

65. Osteology of Head and Neck 65
66. Scalp, Temple and Face 66
67. Side of Neck 68
68. Anterior Triangle of Neck 69

69. Parotid Region 70
70. Temporal and Infratemporal Fossa 71
71. Submandibular Region 72
72. Structures in the Neck 73
73. Prevertebral and Paravertebral Region 74
74. Back of Neck 74
75. Contents of Vertebral Canal 74
76. Cranial Cavity 75
77. Contents of the Orbit 77
78. Mouth and Pharynx 77
79. Nose and Paranasal Sinuses 79
80. Larynx 80
81. Tongue 81
82. Ear 82
83. Eyeball 83
84. Miscellaneous 83

SECTION 7: BRAIN 83

85. Introduction 83
86. Meninges of Brain and Cerebrospinal Fluid 83
87. Spinal Cord 84
88. Cranial Nerves 84
89. Brainstem 85
90. Cerebellum 86
91. Fourth Ventricle 87
92. Cerebrum 88
93. Third Ventricle, Lateral Ventricle and Limbic System 89
94. Some Neural Pathways and Reticular Formation 90
95. Blood Supply of Spinal Cord and Brain 90

SECTION 8: EMBRYOLOGY 91

96. Introduction and Some Preliminary Considerations 91
97. Genetics and Molecular Biology in Embryology 91
98. Reproductive System, Gametogenesis, Ovarian and Menstrual Cycle 95
99. First Week of Development—Stages of Embryology/ Gestational Period 95
100. Second Week of Development—Bilaminar Germ Disk Formation 96
101. Third Week of Development—Germinal Period 97
102. Embryonic Period of Development 98
103. Fetal Period of Development 98
104. Placenta, Fetal Membrane and Twinning 98
105. Formation of Tissues of the Body 99

106. Integumentary System (Skin and its Appendages, Mammary Gland) 99
107. Pharyngeal Arches 99
108. Skeletal System and Muscular System 101
109. Face, Nose and Palate 101
110. Alimentary System I: Mouth, Pharynx and Related Structures 101
111. Alimentary System II: Gastrointestinal Tract 102
112. Liver and Biliary Apparatus; Pancreas and Spleen 103
113. Body Cavities, Diaphragm and Respiratory System 104
114. Cardiovascular System 105
115. Urogenital System 106
116. Nervous System 108
117. Endocrine Glands 109
118. Development of Eye 109

SECTION 9: HISTOLOGY 109

119. Light Microscopy and Tissue Preparation 109
120. Cell Structure 109
121. Epithelia and Glands 110
122. General Connective Tissue 111
123. Cartilage 111
124. Bone 112
125. Muscular Tissue 112
126. Lympathics and Lymphoid Tissue 113
127. Nervous System 113
128. Cardiovascular System 114
129. Skin and its Appendages 114
130. Salivary Gland 115
131. Placenta and Umbilical Cord 115
132. Respiratory System 115
133. Digestive System: Oral Cavity and Related Structures 116
134. Digestive System: General Plan of Gastrointestinal Tract, Stomach and Intestines 116
135. Hepatobiliary System and Pancreas 117
136. Urinary System 118
137. Central Nervous System: Spinal Cord, Cerebellar Cortex and Cerebral Cortex 119
138. Male Reproductive System 120
139. Female Reproductive System 120
140. Endocrine System 121
141. Special Senses: Eye 122
142. Special Senses: Ear 122

PHYSIOLOGY

SECTION 1: GENERAL PHYSIOLOGY 125

1. Defining the Role of Physiology in Modern Medicine 125
2. Functional Organization of Human Body 125
3. Principles of Homeostasis 125
4. Cellular Organization and Intercellular Connections 126
5. Physiology of Genetics and Apoptosis 126
6. Transport Across the Cell Membrane 127
7. Membrane Potential 128
8. Body Fluids 128

SECTION 2: BLOOD AND IMMUNITY 129

9. Introduction to Blood and Plasma Proteins 129
10. Bone Marrow and Hemopoiesis 130
11. Red Blood Cells 130
12. Erythropoiesis 131
13. Destruction of Red Blood Cells 132
14. Hemoglobin and Blood Indices 133
15. Pathophysiology of Anemia and Polycythemia 133
16. Blood Groups and Physiological Basis of Blood Transfusion 134
17. Leukopoiesis 136
18. White Blood Cells 136
19. Thymus and Lymphoid Tissues 137
20. Physiology of Immunity 137
21. Organ Transplantation and Applied Aspects of Immunity 138
22. Introduction to Hemostasis, Thrombopoiesis and Structure, and Properties of Platelets 138
23. Role of Platelets in Hemostasis and Applied Aspects of Platelets 139
24. Blood Coagulation 139
25. Anticoagulants and Applied Aspects of Blood Coagulation 141

SECTION 3: NERVE AND MUSCLE 142

PART A: NERVE

26. Structure and Functions of Neurons 142
27. Nerve Potentials and Propagation of Nerve Impulse 142
28. Properties and Classification of Nerve Fibers, Nerve Injury and other Applied Aspects 144

PART B: NEUROMUSCULAR JUNCTION

29. Neuromuscular Transmission 145

PART C: MUSCLES

30. Structure of Skeletal Muscle: Physiological Aspects 146
31. Excitation-Contraction Coupling and Molecular Basis of Skeletal Muscle Contraction 147
32. Skeletal Muscle: Properties, Fiber Types, and Applied Aspects 148
33. Smooth Muscle and Cardiac Muscle 150

SECTION 4: AUTONOMIC NERVOUS SYSTEM 150

34. Functional Organization of Autonomic Nervous System 150
35. Sympathetic System 150
36. Parasympathetic System 151
37. Control of Autonomic Functions and Applied Aspects 151
38. Autonomic Function Tests 151
39. Heart Rate Variability 151
40. Blood Pressure Variability and Baroreflex Sensitivity 151

SECTION 5: CARDIOVASCULAR SYSTEM 151

PART A: GENERAL INTRODUCTION

41. Functional Organization of Cardiovascular System 151

PART B: HEART

42. Functional Anatomy of Heart, Cardiac Innervation and Cardiac Muscle 152
43. Properties of Cardiac Muscle 153
44. Electrophysiology of the Heart 154
45. COnducting System of Heart; Origin and Spread of Cardiac Impulse 154
46. Electrocardiogram 155
47. Cardiac Cycle 157
48. Cardiac Output 159
49. Heart Rate and Arterial Pulse 160

PART C: CIRCULATION

50. Principles of Hemodynamics 160
51. Arterial System 161
52. Capillary Circulation 161
53. Lymphatic System and Lymphatic Circulation 162
54. Venous System 162
55. Regulation of Blood Pressure 162
56. Integrated Regulation of Cardiovascular Functions 164
57. Overview of Regional Circulation 164
58. Cerebral Circulation 164
59. Coronary Circulation 165
60. Cutaneous, Splanchnic and Skeletal Muscle Circulation 166
61. Fetal and Neonatal Circulation 166

PART D: APPLIED AND CLINICAL ASPECTS OF CARDIOVASCULAR SYSTEM

62. Pathophysiology of Hypertension and Hypotension 166
63. Pathophysiology of Shock 167
64. Pathophysiology of Heart Failure 168

SECTION 6: RESPIRATORY SYSTEM 168

65. Functional Organization of Respiratory System 168
66. Mechanics of Breathing 168
67. Pulmonary Ventilation 171
68. Pulmonary Circulation and Ventilation-Perfusion Ratio 172
69. Diffusion and Gas Exchange in Lungs 173
70. Oxygen Transport 173
71. Carbon Dioxide Transport 174
72. Regulation of Respiration 175
73. Physiological Changes at High Altitude 177
74. Hypoxia, Cyanosis and Oxygen Therapy 177
75. Hazards of Deep Sea Diving and Effects of Increased Barometric Pressure 178
76. Respiration in Abnormal Conditions and Abnormal Respirations 178
77. Artificial Ventilation and Cardiopulmonary Resuscitation 179
78. Pulmonary Function Tests 180

SECTION 7: GASTROINTESTINAL SYSTEM 180

PART A: INTRODUCTION TO GASTROINTESTINAL SYSTEM

79. Functional Organization of Gastrointestinal System and Principles of Gastrointestinal Regulations 180
80. Gastrointestinal Hormones 180

PART B: GASTROINTESTINAL SECRETIONS

81. Principles of Gastrointestinal Secretion and Secretion of Saliva 181
82. Gastric Secretion 182
83. Pancreatic Secretion 184
84. Physiology of Liver, Liver Function Tests, and Pathophysiology of Jaundice 184
85. Biliary Secretion 185
86. Intestinal Secretion 186
87. Secretion of Large Intestine 186
88. Introduction to Gastrointestinal Motility 187
89. Chewing and Deglutition 187
90. Esophageal Motility 188
91. Gastric Motility 188
92. Small Intestinal Motility 189
93. Motility of Large Intestine 190

PART C: DIGESTION AND ABSORPTION

94. Principles of Digestion and Absorption 190

SECTION 8: RENAL SYSTEM 191

95. General Introduction and Functional Anatomy of Kidney 191
96. Renal Blood Flow 193
97. Glomerular Filtration 194
98. Tubular Functions 195
99. Mechanisms of Urine Concentration and Dilution 196
100. Regulation of Ions and Water Reabsorption in Kidney 197
101. Water Excretion, Diuresis, and Diuretics 197
102. Acidification of Urine 198
103. Regulation of Volume, Composition and Osmolality of Body Fluid Compartment 198
104. Kidney Function Tests and Renal Failure 198
105. Physiology of Micturition, and Bladder Dysfunctions 200

SECTION 9: ENDOCRINE PHYSIOLOGY 201

106. Introduction to Endocrinology 201
107. Mechanisms of Hormone Action 201
108. Hypothalamus and Hypothalamopituitary Axis 202
109. Pituitary Gland: The Anterior Pituitary 202
110. Posterior Pituitary 204
111. Thyroid Gland 205
112. Adrenal Gland: The Adrenal Medulla 207
113. Adrenal Cortex 208
114. Endocrine Pancreas 210
115. Blood Glucose Homeostasis and Pathophysiology of Diabetes Mellitus 211
116. Calcium and Phosphate Metabolism and Physiology of Bone 212
117. Parathyroid Gland, Calcitonin and Vitamin D 213
118. Role of Calcitonin, Vitamin D and other Hormones in Calcium Metabolism and Bone Physiology 214
119. Pineal Gland 214
120. Local Hormones 214

SECTION 10: REPRODUCTIVE SYSTEM 214

PART A: GENERAL REPRODUCTIVE PHYSIOLOGY

121. Sex Differentiation and Development, Puberty and Menopause 214
122. Physiology of Puberty and Menopause 215

PART B: MALE REPRODUCTIVE PHYSIOLOGY

123. Male Reproductive System 215
124. Spermatogenesis 216
125. Testicular Hormones and Testicular Abnormalities 217

PART C: FEMALE REPRODUCTIVE PHYSIOLOGY

126. Female Reproductive System and Oogenesis 217
127. Development of Ovarian Follicle and Ovulation 218
128. Menstrual Cycle and Menstrual Disorders 218
129. Ovarian Hormones and Control of Ovarian Functions and Applied Aspects 220

PART D: PHYSIOLOGY OF CONCEPTION, PREGNANCY, LACTATION AND CONTRACEPTION

130. Physiology of Copulation 220
131. Pregnancy and Parturition 221
132. Physiology of Breast Development and Lactation 222
133. Physiology of Contraception 222

SECTION 11: NEUROPHYSIOLOGY 223

PART A: INTRODUCTION TO NEUROPHYSIOLOGY

134. Functional Organization of Nervous System 223
135. Synaptic Transmission in Central Nervous System 224

PART B: THE SENSORY SYSTEM

136. Introduction to Sensory System and Physiology of Receptors 225
137. Sensory Communication to Spinal Cord 226
138. Ascending Pathways 227
139. Physiology of Pain, Itch and Temperature 228
140. Trigeminal System 229
141. Thalamus 229
142. Sensory Cortex 230
143. Sensory Abnormalities 230

PART C: THE MOTOR SYSTEM

144. Introduction to and Organization of Motor System 230
145. Segmental Organization of Motor System 230
146. Muscle Spindle and Golgi Tendon Organ 230
147. Spinal Reflexes 231
148. Supraspinal Control: The Descending Pathways 233
149. Regulation of Muscle Tone, Posture and Movement: Spinal, Medullary, Midbrain and Cortical Integration 234
150. Basal Ganglia 235
151. Cerebellum 236
152. Vestibular Apparatus 237

PART D: HYPOTHALAMUS, EEG AND SLEEP; LIMBIC FUNCTIONS AND HIGHER FUNCTIONS OF BRAIN AND CEREBROSPINAL FLUID

153. Functions of Hypothalamus 238
154. Physiology of Reticular Activating System 239
155. Electroencephalogram and Sleep 239
156. Limbic System 240

157. Physiology of Learning and Memory 241
158. Physiology of Language and Speech 241
159. Neocortex (Association Cortex) and Cerebral Asymmetry 242
160. Functions of the Lobes of the Brain and Cortical Plasticity 242
161. Cerebrospinal Fluid 242

SECTION 12: SPECIAL SENSES 243

PART A: VISION

162. Functional Anatomy of Eye 243
163. Image-forming Mechanism 244
164. Photoreceptor Mechanism 245
165. Visual Pathway and Visual Cortex 246
166. Visual Acuity, Visual Field, Light and Dark Adaptations, and Visual Reflexes 246
167. Color Vision 248
168. Movements of the Eye 249
169. Electro-oculography, Electroretinography and Visual-evoked Potentials 249

PART B: HEARING

170. Functional Anatomy and Functions of the Ear 249
171. Auditory Pathways 251
172. Mechanism of Hearing 251
173. Hearing Defects and Hearing Tests 252

PART C: SMELL AND TASTE

174. Physiology of Smell 253
175. Physiology of Taste 253

SECTION 13: INTEGRATIVE PHYSIOLOGY 254

176. Structure and Functions of the Skin 254
177. Regulation of Body Temperature and Acclimatization to Hot and Cold Environments 255
178. Aviation and Space Physiology 257
179. Physiology of Exercise and Sports Science 257
180. Principles of Acid-Base Homeostasis 258
181. Physiology of Growth and Development 259
182. Principles of Energy Metabolism 259
183. Physiology of Nutrition 259
184. Physiology of Aging and Oxidative Stress 259
185. Physiology of Yoga and Prevention of Aging 260
186. Miscellaneous 260

BIOCHEMISTRY

SECTION 1: CHEMICAL CONSTITUENT OF LIFE 265

1. Biomolecules and the Cell 265
2. Carbohydrates 265
3. Lipids 267
4. Proteins and Amino Acids 268
5. Nucleic Acids and Nucleotides 270
6. Enzymes 271
7. Vitamins 275

SECTION 2: PHYSIOLOGICAL BIOCHEMISTRY 279

8. Digestion and Absorption 279
9. Plasma Proteins 280
10. Hemoglobin and Porphyria 282
11. Biological Oxidation 285

SECTION 3: METABOLISM 287

12. Introduction to Metabolism 287
13. Metabolism of Carbohydrates 287
14. Metabolism of Lipids 292
15. Metabolism of Amino Acids 296
16. Integration of Metabolism 302
17. Metabolism of Nucleotides 303
18. Mineral Metabolism 305

SECTION 4: CLINICAL BIOCHEMISTRY AND NUTRITION 308

19. Hormones 308
20. Organ Function Test 309
21. Water, Electrolyte and Acid-Base Balance 310
22. Tissue Proteins and Body Fluids 312
23. Nutrition 313

SECTION 5: MOLECULAR BIOLOGY AND BIOTECHNOLOGY 315

24. DNA—Replication, Recombination and Repair 315
25. Transcription and Translation 316
26. Regulation of Gene Expression 317
27. Recombinant DNA Technology 318

SECTION 6: CURRENT TOPICS 319

28. Human Genome Project 319
29. Gene Therapy 319

30. Bioinformatics 320
31. Metabolism of Xenobiotics (Detoxification) 320
32. Prostaglandins and Related Compounds 321
33. Biological Membranes and Transport 321
34. Free Radicals and Antioxidants 322
35. Environmental Biochemistry 323
36: Insulin, Glucose Homeostasis and Diabetes Mellitus 323
37. Cancer 324
38. Acquired Immunodeficiency Syndrome 325

SECTION 7: BASICS TO LEARN BIOCHEMISTRY 325

39. Introduction to Bio-organic Chemistry 325
40. Overview of Biophysical Chemistry 325
41. Tools of Biochemistry 325
42. Immunology 326
43. Miscellaneous 326
