Contents

SECTION: ONE

AN INTRODUCTION TO ANATOMY

1. General Embryology 3
2. Ovarian Cycle and Fertilization 10
3. Stages of Embryology (Gestational Periods) 15
4. Human Genetics 36
5. Teratology and Normal Birth 45

SECTION: TWO

NEUROANATOMY

6. The Nervous System 59
7. Development of the Brain 74
8. Meninges of the Brain and Spinal Cord 81
9. Cerebral Hemisphere 86
10. Basal (Nuclei) Ganglia, Diencephalon, Third Ventricle and Thalamus 98
11. Blood Supply of Brain 104
12. The Limbic System and the Brainstem 110
13. The Cerebellum 126
14. The Fourth Ventricle and CSF Circulation 133

SECTION: THREE

GROSS ANATOMY (HEAD AND NECK)

15. The Scalp 141
16. The Face 155

17. Side of the Neck, Triangles and Deep Cervical Fascia 178
18. Muscles of the Back 197
19. Suboccipital Triangle of the Neck 204
20. Lacrimal Apparatus 209
21. The Contents of the Orbit 217
22. The Spinal Cord 239
23. Structures in the Midline and Anterior Triangles of the Neck 253
24. The Parotid Gland 281
25. The Infratemporal Region 288
26. The Temporomandibular Articulation 304
27. Otic and Pterygo (Spheno) Palatine Ganglia 309
28. Dural Venous Sinuses, Emissary Veins and Diploic Veins 313
29. Pituitary, Thyroid and Parathyroid Glands 322
30. The Subclavian Artery 335
31. The Cranial Nerves 342

SECTION: FOUR

GROSS ANATOMY (MOUTH, EAR, EYE AND NOSE)

32. Mouth and Tongue 369
33. Tooth 380
34. The Pharynx 387
35. The Palate 402
36. Larynx and Trachea 407
37. The Ear and its Nerves 424
38. The Eyeball and Optic Nerves 447
39. Nasal Cavity, Olfactory Nerves and Paranasal Air Sinuses 460
40. The Prevertebral and Vertebral Muscles 474
41. The Lymphatic Drainage of Head and Neck 478

SECTION: FIVE

OSTEOLOGY

42. Anatomy of the Skull 483
43. The Bones of Cervical Vertebrae 500
44. The Bones of Skull 508

SECTION: SIX

HISTOLOGY SLIDES

45. Microscopic Study of Cells and Tissues 557

Bibliography 581

Index 583
