CONTENTS

CHAPTER 25
CATARACT SURGERY
Its Evolution And Progress 3

The Unique Innovative and Transforming Events 5
Anatomic Highlights of the Lens in Three Dimensions 6
How Cataracts Respond Differently 7
Cataract Surgery in its Different Stages 7
1. The Period of Extracapsulars with Coaching – Jaques Daviel 7
2. Precursor of Intracapsulars 8
3. The 50 Year Era of Intracapsulars 9
4. The Development of Enzymatic Zonulolysis 11
Cryoextraction 13
Helmholtz´s Invention of Ophthalmoscope 13
Detecting Changes in Claude Monet´s Color of Cataracts 15
Intraocular Lenses in the Horizon 17
Harold Ridley's "Fight for Sight" 17
Design and Creativity for the First IOL 19
Saint Thomas Hospital and the First IOL Implanted Successfully 20
First IOL Implant in the United States 21
Historical Personalities Related to Harold Ridley's Development of his Intraocular Lens and Landmark Operation 21
Key Developments in Cataract Surgery Over the Last 60 Years 25
Cataract Surgery- Problems Pending Solutions 26

CHAPTER 26
CATARACT INCISIONS – PART I
Small Incision and Fluidics In Cataract Surgery 33

Surgical Incisions for Phaco 35
Limbal Incision and Scleral Tunnel Incisions 36
Corneal Sutureless Incision 37
Scleral Tunnel Sutureless Cataract Wound 38

Mechanism of Valve-Type Self Sealing Cataract Wound 39
Combining Tunnel Incision with Opening in Anterior Capsule 39
The Significant Role of Dr. Howard Fine 40
Capsulorhexis 41
Jack Dodick's Technique 41
Gimbel's Concepts 43
Malbran's CCC Technique 44
Hydro Processes Related to Phacoemulsification 46
Hydrodelineation, Hydrosonics and Hydrolysis 47

CATARACT INCISIONS – PART II
The Evolution of Cataract Surgery Incisions 53

Fine's Original Technique 53
Self Sealing Scleral Tunnel Incision 55
Increased Incidence of Infectious Endophthalmitis Following Cataract Surgery with CCI 56
Endophthalmitis Prophylaxis 57
The Need for 4th Generation Fluoroquinolones 58
The Architecture of a Different Clear Corneal Incision 59
Grooved Incision 60
Routinely Constructed Side-Port Incisions 61
Phaco Handpiece Paracentesis 61
Irrigating Chopper Paracentesis 62

CHAPTER 27
CATARACT SURGERY – PART I
Phacoemulsification 69

Charles Kelman's Remarkable Development 71
Initial Struggles and Hurdles 72
The Importance of the American Academy's "KPE Statistically Equal in Results" 74
Major and Additional Important Changes 75

The Evolution of Surgical Techniques 76
Sinskey's and Kratz's Methods 77
Highlights in Development of Surgical Instrumentation for Phacoemulsification 78
Charles Kelman, A Life Changing Experience 81
Phacotechnology and Phacotechniques During the Past 60 Years 82
The Role of Engineering in Development of Phacoemulsification 84

CATARACT SURGERY – PART II
Rationale Behind The Phaco Machine 89

Mechanism of the Phaco Machine 91
The Principles of How the Phaco Machine Works 92
Phacodynamics 93
The Phaco Handpiece 94
Mechanism of Action of Phaco Probe Tip 95
Basic Phaco Foot Pedal Functions 96
Irrigating Bottle Height Related to Flow Rate 97
Varying Ultrasonic Settings While Proceeding Through a Nucleus Of Varying Density During the Creation of a Furrow of Groove 98
How to Program the Machine for Optimal Use 99
Fluid Dynamics During Phaco 101
Fluidics and Physics of Phacoemulsification 104
Importance of the Surge Phenomenon 104

CHAPTER 28
INTRAOCULAR LENSES – PART I
PMMA IOL´s, Posterior Chamber Lenses and Foldable IOL´s 111

Nature of Intraocular Lenses 113
The First Intraocular Lens Implants 114
Summary of Research and its Results 117
Providing Haptic Support 118
Posterior Chamber Lenses 118
Major Problems – Looking for a Solution for Posterior Chamber Lenses 119
Foldable Intraocular Lenses 120
Effect of IOL Implantation on Incision Size 120
Materials and Optics 121

INTRAOCULAR LENSES – PART II
ReSTOR Apodized Diffractive IOL´s 125

AcrySof ReSTOR Intraocular Lenses 127
Main Characteristics of the Different AcrySof ReSTOR IOL's 129
Visual Performance After AcrySof ReSTOR IOL Implantation 130
Demographic Characteristics of Participants 131
Visual Acuity Results for Distance, Intermediate and Near Vision 132
Refractive Lens Exchange Performance 136

CHAPTER 29
OCULAR TUMORS – PART I
Metastatic Cancer to The Eye 147

Introduction 149
Presentation, Ocular Manifestations 149
Diagnosis and Supportive Evaluation 153
Differential Diagnosis 154
Management 156
Systemic Evaluations 156
Therapy Options 156
Radiotherapy 157
Side Effects of Radiotherapy 158
Survival and Outcome 160

OCULAR TUMORS – PART II
Uveal Melanoma 165

Introduction 167
Collaborative Ocular Melanoma Study 167
COMS Protocol Compliance 168
COMS Small Choroidal Melanoma Observational Study 168
COMS Medium Choroidal Melanoma Trial 168
COMS Large Choroidal Melanoma Trial 170
Choroidal Melanoma: Tumor Characteristics and Diagnosis 170
Differential Diagnosis of Choroidal Melanoma 173
Other Diagostic Considerations 175
Therapeutic Approaches 175
Observations 175

Brachytherapy 176
Charged Particle Radiotherapy 180
Transpupillary Thermotherapy (Small Choroidal Melanomas) 181
Surgical Resection 181
Enucleation 181
Ciliary Body Melanoma 182
Iris Melanoma 183
Uveal Melanoma: Mortality 184
Surveillance Following Intervention 184
New Approaches to Managing Uveal Melanoma 184

CHAPTER 30
OCULAR TRAUMA
Ruptured Globe And Penetrating Injuries 191

Pathophysiology and Prognosis 193
Main Pronostic Factors 194
Other Key Factors Found to Correlate with Final Visual Prognosis 195
Mechanism of Secondary Intraocular Complications 197
Important Clinical Clues 198
Initial History and Examination 198
Diagnosis 199
Imaging and Electrophysiological Examination 200
Management of Anterior Segment Penetrating Wounds 200
Corneal Lacerations 200
Repair of Combined Corneal and Scleral Wounds 201
Anterior Chamber Reformation 202
Role of Viscoelastics in Penetrating Injuries of Anterior Segment 203

CHAPTER 31
OCULAR INFECTIOUS DISEASES – PART I
Bacterial, Fungal And Parasitic Keratitis 209

Introduction 211
Contact Lens Wear and Keratitis 211
Post-Refractive Surgery Infections 212
Post-Keratoplasty Infections 213

Keratitis Outbreaks 214
Confocal Microscopy and Infectious Keratitis 215
Standarization of Ophthalmic Laboratorial Diagnosis 216
Conclusions 217

OCULAR INFECTIOUS DISEASES – PART II
Blepharitis, Conjunctivitis And Trachoma 221

Blepharitis 223
Pathophysiological Mehanisms 225
Role of Microorganisms 226
Treatment 227
Lid Hygiene, Antibiotics and Dietary Supplementation 227
Bacterial Conjunctivitis 228
Acute Bacterial Conjunctivitis 228
Hyperacute Bacterial Conjunctivitis 229
Chronic Bacterial Conjunctivitis 230
Adenoviral Conjunctivitis 230
Pharyngeal Conjunctival Fever 231
Epidemic Keratoconjunctivitis 231
Acute Hemorrhagic Conjunctivitis 232
Herpes Simplex Conjunctivitis 232
Ophthalmia Neonatorum 233
Inclusion Conjunctivitis 234
Neonatal Inclusion Conjunctivitis 234
Inclusion Conjunctivitis in Adults 235
Trachoma 236
Parinaud Oculoglandular Syndrome 238
Final Considerations 238

CHAPTER 32
OCULAR INFECTIOUS DISEASES – PART III
Herpes Simplex Virus Keratitis 245

Introduction 247
Clinical Picture 247
Infectious Epithelial Keratitis 247

Neurotrophic Keratopathy 248
Stromal Keratitis 248
Endothelitis 249
Treatment 250
Infectious Epithelial Keratitis 250
Neurotrophic Keratopathy 250
Stromal Keratitis and Endothelitis 251
Necrotizing Stromal Keratitis 251
Surgical Care and Prophylaxis 251
Herpetic Keratitis, caused by Herpes Simplex Virus Type 1 251

OCULAR INFECTIOUS DISEASES – PART IV
Herpes Zoster Virus Keratitis 255

Introduction 257
Risk Factors 257
Clinical 257
Treatment 259

CHAPTER 33
OCULAR INFECTIOUS DISEASES – PART V
Infectious Endophthalmitis 267

Introduction, Definition and Epidemiology 269
Etiology, Clinical Findings, Classification and Laboratory Diagnosis 269
Medical Therapy – Systemic and Topical Application of Antiobiotics 271
Intravitreal Injections of Antibiotics 272
Surgical Therapy – Vitrectomy 272
Concepts in Prophylaxis 273
Final Considerations 274

OCULAR INFECTIOUS DISEASES – PART VI
Uveitis 279

Definition, Concepts of Disease, Pathogenesis and Classification 281
Diagnostic Testing 282
Examination of the Patient with Uveitis in the Past and New Technologies 283
Ophthalmoscope and Slit Lamp Exam 283
Laser flare-cell Photometry 283
Fluorescein Angiography and Indocyanine Green Angiography 284
Optical Coherence Tomography (OCT) 285
Molecular Biology Techniques 287
Invasive Diagnostic Testing for Uveitis 287
Infectious Causes of Uveitis 288
Toxoplasmosis 288
Viral Retinitis 289
Syphilis 291
Tuberculosis 292
Specific Treatment 293
Surgical Advances in the Last Decade 296

CHAPTER 34
OPTICAL COHERENCE TOMOGRAPHY (OCT) – PART I
Indications And Interpretations 303

Introduction 305
Principles of Operation 306
Color Coding in OCT 306
Interpretation of OCT 307
Scanning Protocols 308
Quantitative Analysis Algorithms 309
Time Domain vs Fourier (Spectral) OCT 309
Anterior Segment Application (AS-OCT) 310
OCT Benefits in the Diagnosis of Retinal Diseases 311

OPTICAL COHERENCE TOMOGRAPHY (OCT) – PART II
Its Applications 317

The Development and Clinical Impact of OCT 319
Clinical Use 321
Healthy 322
Most Common Ophthalmic Applications 322
Macular Degeneration 322
Glaucoma 322
Macular Hole 326
Non-Proliferative Diabetic Retinopathy 326
Epiretinal Membrane 327
Additional OCT Applications 328

OPTICAL COHERENCE TOMOGRAPHY (OCT) – PART III
Its Evolution 333

Brief History of OCT 335
Importance of OCT in Ophthalmology 335
Understanding and Better Evaluating Retinal Diseases 336
Time Domain and Spectral / Fourier Domain OCT: How Do They Work and What Are the Differences? 338
Clinical Advantages of Spectral / Fourier Domain OCT 339
Other Applications in Ophthalmology 340
Ultrahigh Resolution OCT 342
New Directions in Future OCT 342

CHAPTER 35
EVOLUTION OF STRABISMUS IN THE PAST 60 YEARS 351

The Most Important Developments in Strabismus and Their Evolution in the Last 60 Years 353
The Management of Amblyopia 353

Causes of Irreversible Amblyopia 354
Refractive Surgery for Prevention of Amblyopia in the Young Child 354
Intraocular Lenses in Aphakic Babies 354
Bilateral Congenital Cataract 356
Congenital and Very Early Onset Strabismus 356
Improvement in Anesthesia and Early Surgery in Children 358
The Three Most Important Advances in Strabismus of the 1970's 358
Prismotheraphy 358
Presurgical Treartment 359
Botulinum Oculinum Toxin 360
Microscope 360
Posterior Fixation Suture Procedure 361
Muscle Procedures Introduced Close to or After 1950 362
Adjustable Sutures 362
Alphabetic Patterns 363
Brown's Superior Oblique Tendon Sheath Syndrome 364
Overcorrections, not a New Occurrence but a New Approach 365
Instrumentation 365
Past, Present, Future 365
Influence of Radiology on Strabismology 366
Factors Important to Developments in Strabismus, the Last 60 Years 366
Specialty Clinics 366
Fellowship Training 367
Information Explosion 367

CHAPTER 36 - A
COSMETIC AND FUNCTIONAL
OPHTHALMIC PLASTIC SURGERY 373

Cosmetic Applications of Botulinum Toxin 375
The Use of Botulinum Toxin 375
Basic Supplies Required for BOTOX 377
Reconstitution and Dilution 378
Botulinum Endotoxin in Paralytic Strabismus 380
Mechanism of Action of Botulinum Endotoxin 381
Preoperative Patient Preparation 382
Injection Technique 382

Variabilities in Injection Technique 382
Indications for Botulinum Toxin 383
Contraindications and Complications 384
Surgical Techniques on the Rectus Muscles 385
Surgical Techniques on the Oblique Muscles 386
Surgical Management of Dry Eye 387
Description of Each Technique 388
Dacryodeposits 388
Parotid Duct Derivation 388
Salivary Gland Transplantation Without Vascular Anastomosis 388
Salivary Gland Transplantation With Vascular Anastomosis 390
Mucosal Transplant 392
Occlusion of the Canaliculi 392
Blepharorraphy 393
Cisternoplasty 396
Inducing Blepharoptosis 397
Lid / Eye Congruence 397

CHAPTER 36 - B
THE ROLE OF OPHTHALMIC FOUNDATIONS IN THE WESTERN HEMISPHERE 403

Prevention of Blindness in Mexico 405
Why Did I Start Assisting Labor in Ophthalmology? 405
Prevention of Blindness in Peru 411
Social Responsibility and Ophthalmological Institutions 411
Prevention of Blindness in Colombia 416
A Social and Communitarian Outreach Program 416
